

GUIDELINES FOR THE PREVENTION OF CORRUPTION/BRIBERY FOR SHIONOGI BUSINESS PARTNERS

With the cooperation of business partners, every Shionogi Group company strives to observe compliance such that no part of the Shionogi Group would ever participate in any act of corruption and/or bribery.

The “Shionogi Group Anti-Corruption/Anti-Bribery Policy” was enacted in April 2014 with a clear statement of our intention that no part of the Shionogi Group would ever participate in any act of corruption and/or bribery. Additionally, we have strived to help all of the Shionogi Group’s business partners to fully understand this policy, its intentions, and its underlying principles, and sought their cooperation in taking the steps and implementing the procedures necessary to prevent such acts.

According to the increasingly strict laws and penalties against corruption and/or bribery worldwide, Shionogi formulated the “Guidelines for the Prevention of Corruption/Bribery for Shionogi Business Partners,” which was prepared in accordance with the spirit of the Policy and outlined the compliance requirements to be observed by Shionogi business partners, in the hope of further strengthening our concrete management systems required for preventing any act of corruption and/or bribery.

We highly appreciate the understanding and cooperation of all Shionogi business partners with regard to the objectives of these Guidelines.
