Financial Highlights / Non-Financial Highlights

SHIONOGI has adopted International Financial Reporting Standards (IFRS) from fiscal 2019. The financial figures for fiscal 2018 are shown according to both Japanese Generally Accepted Accounting Principles (JGAAP) and IFRS.

Revenue

Revenue was ¥426.7 billion, a 27.3 percent increase year on year, reaching a record high. Domestic revenue of prescription drugs were ¥179.7 billion, a 101.7 percent increase year on year, as a result of the acquisition of emergency approval for Xocova, a treatment for COVID-19, revenue from the purchase of two million doses by the Japanese government, and sales from general distribution. Revenue from overseas subsidiary sales and exports was ¥42.5 billion yen, a 23.7 percent increase year on year, due to the growth in sales of cefiderocol in the U.S. and Europe. Royalty income was ¥174.7 billion, a 3.6 percent decrease year on year.

R&D expenses

Operating profit/Operating profit margin

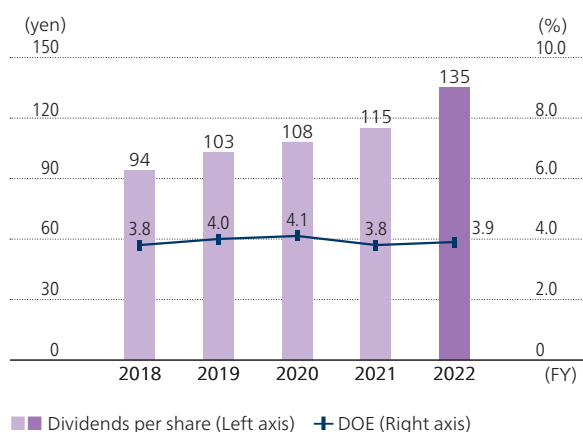

Operating profit was ¥149.0 billion, a 35.1 percent increase year on year due to a significant increase in revenue, despite an increase in R&D expenses resulting from investments in priorities such as COVID-19 treatments and vaccines, as well as impairment losses associated with the revision of the development plan for zatolmilast, an Alzheimer's drug. Core operating profit, which excludes non-recurring items, was ¥158.5 billion, an increase of 43.3 percent year on year.

Royalty income

Royalty income from ViiV Healthcare Limited was ¥168.5 billion, a 3.2 percent decrease year on year, despite the rapid growth in sales of the long-acting HIV franchise out-licensed to UK-based ViiV Healthcare Limited and the receipt of a lump-sum payment in fiscal 2021 accompanying the settlement of the patent infringement litigation brought against U.S.-based Gilead Sciences, Inc by ViiV Healthcare Limited. In addition, royalty income from Roche was ¥0.9 billion due to an increase in sales of *Xofluza* generated from the global influenza epidemic that occurred for the first time in several years. As a result, royalty income for the fiscal year under review was ¥174.7 billion, a 3.6 percent decrease from the previous year.

Dividends per share/DOE

Dividends per share were ¥135, up ¥20 from the previous year, making this our eleventh consecutive year of dividend growth. The annual dividend increase of ¥20 was the largest ever. DOE was 3.9 percent.

ROE

ROE was 17.8 percent. This was because of record high profits despite an increase in equity items (equity attributable to owners of the parent).

Financial Highlights / Non-Financial Highlights

Average salary

Since we use performance-linked bonuses, the average salary has been declining due to weaker business performance, but increased bonuses awarded for the achievement of R&D milestones bumped average pay up by approximately ¥530,000 from the previous year.

Acquisition rate of childcare leave

Although the target of “Acquisition rate of childcare leave/days off for childcare purposes of 50 percent or more for male employees” is now achieved regularly, the number of days taken remains low. As a result, from fiscal 2022, we have set a new target of 25 percent acquisition rate of 14 days or more for male employees and started initiatives.

Number of female managers/Ratio of female managers

We were working to achieve our target of the rate of female employees occupying management positions of at least 15 percent by the end of fiscal 2022, but it remained at 14.2 percent. We will continue our efforts to increase the ratio of female managers.

As of April 1 the following fiscal year

Ratio of female directors / Ratio of female executive officers / Ratio of female organizational heads

The ratio of female executive officers continues to be 0%, but the ratio of female organizational heads who will serve as future executive officers is steadily increasing. We will strive to increase this ratio by expanding the talent pool as executive candidates.

As of April 1 the following fiscal year

GHG emissions (Scope 1 and 2*)

*1 Scope 2 emissions are calculated using the market-based method.

Although GHG emissions have been on an upward trend in line with the growth of our businesses, we have reduced them from the previous year and achieved our reduction targets for fiscal 2022 by introducing renewable energy ahead of schedule and strengthening emissions controls.

*2 Including Nanjing Plant (Nanjing Chang'ao Pharmaceutical Co., Ltd.). Emissions from UMN Pharma, Inc. and Nagase Medicals Co., Ltd. (currently Shionogi Pharma Co., Ltd., Itami Plant), which constitute the boundary for SBT targets, included as of fiscal 2019.

Code of Conduct signature rate (FY2022)

100%

* Shionogi & Co., Ltd. and some domestic group companies

Education and training expenses per person (FY2022)

¥70 thousand

* (Education and training expenses + amount of self-investment support)/number of employees (Domestic consolidation)

Notes: 1. From the fiscal year ended March 31, 2015, the Company has adopted a new accounting standard for research and development expenses (business research expenses). This change has been reflected in figures for the fiscal year ended March 31, 2014.

2. In the fiscal year ended March 31, 2019, the Company changed the presentation method for tax effect accounting. The change has been reflected in figures for the fiscal year ended March 31, 2015, and subsequent periods.

3. International Financial Reporting Standards (IFRS): Accounting standards defined by the non-government organization International Accounting Standards Board (IASB) headquartered in London.

4. IFRS adopted from the fiscal year ended March 31, 2020.

Note 1: Including Nanjing Plant (Nanjing Chang'ao Pharmaceutical Co., Ltd.), Emissions from UMN Pharma, Inc. and Nagase Medicals Co., Ltd. (currently Shionogi Pharma Co., Ltd., Itami Plant), which constitute the boundary for SBT targets, included as of fiscal 2019. Scope 2 emissions are calculated using the market-based method.
 Note 2: Including Nanjing Plant (Nanjing Chang'ao Pharmaceutical Co., Ltd.). Energy consumption by Nagase Medicals Co., Ltd. (currently Shionogi Pharma Co., Ltd., Itami Plant) included as of fiscal 2021.

Environmental Data

SHIONOGI calculates energy consumption and greenhouse gas (GHG) emissions using calorie conversion factors and CO₂ emission factors for fuels, steam and electricity used each fiscal year.

GHG emissions and energy consumption data in fiscal 2022 marked with were subject to third-party assurance by KPMG AZSA Sustainability Co., Ltd.

Indicators	Unit	2018	2019	2020	2021	2022	
Greenhouse gas (GHG)	Total of Scope 1, 2 and 3 (Location-based)	tons-CO ₂	223,063	240,624	209,439	230,473	230,700
	(Market-based)	tons-CO ₂	217,924	232,355	203,048	226,362	223,077
	Total of Scope 1 and 2 (Location-based)	tons-CO ₂	87,850	85,208	81,730	88,275	89,589
	(Market-based)	tons-CO ₂	82,711	76,939	75,339	84,164	81,966
	Scope 1 (Intensity per unit of sales)	tons-CO ₂ /¥1 million	41,349	37,519	37,537	41,264	41,376 <input checked="" type="checkbox"/>

Steam		MWh	0	4,406	8,159	5,314	5,103

* Emissions are calculated using emission units that take into account consumption tax and local consumption tax from fiscal 2022. Accordingly, emissions before fiscal 2021 are recalculated using emission units that take consumption taxes into account.

Calculation methods for environmental performance data

Boundary of calculation	Scope 1 and 2	SHIONOGI Group (excluding overseas Group companies [administrative offices]): SHIONOGI Group companies in Japan and Nanjing Plant (Nanjing Chang'ao Pharmaceutical Co., Ltd.)
	Scope 3	Category 1 Shionogi & Co., Ltd. and Shionogi Pharma Co., Ltd. (Shionogi & Co., Ltd. in fiscal 2018) Category 2 SHIONOGI Group companies in Japan (Shionogi & Co., Ltd. in fiscal 2018) Category 3 SHIONOGI Group companies in Japan (Shionogi & Co., Ltd. in fiscal 2018) Other categories SHIONOGI Group companies in Japan (Shionogi & Co., Ltd. in fiscal 2018) (UMN Pharma, Inc. is not included in Category 4 and Category 12 of the Other category)
	Energy consumption	SHIONOGI Group (excluding overseas Group companies [administrative offices]): SHIONOGI Group companies in Japan and Nanjing Plant (Nanjing Chang'ao Pharmaceutical Co., Ltd.)

Calculation methods

Indicators	Calculation methods
Scope 1	CO ₂ emissions resulting from fuel use Calculation methods: Based on the "Greenhouse Gas Emissions Accounting and Reporting Manual (Ver. 4.9)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan CO ₂ emission factors: Based on the "Greenhouse Gas Emissions Accounting and Reporting Manual (Ver. 4.9)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan
	CO ₂ emissions resulting from purchase of electricity and steam Calculation methods: Based on the "Greenhouse Gas Emissions Accounting and Reporting Manual (Ver. 4.9)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan CO ₂ emission factors: Electricity (Japan) (location-based): National average emission factors from "Emission Factors by Power Suppliers (for the calculation of GHG emissions by specified emitters) (FY2021 results)" published by the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan (January 24, 2023, partially revised on May 26) Electricity (Japan) (market-based): Adjusted emissions factors from "Emission Factors by Power Suppliers (for the calculation of GHG emissions by specified emitters) (FY 2021 results)" published by the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan (January 24, 2023, partially revised on May 26) Electricity (China) (both location-based and market-based): fiscal 2022: No. 43 National Grid Average Emission Factor (2022) in Climate Letter [2023] No.43 of Office of the Ministry of Ecology and Environment of China /before fiscal 2021: Emissions Factors (2019) of the International Energy Agency (IEA) Steam (both location-based and market-based): Emissions factors from the "Greenhouse Gas Emissions Accounting and Reporting Manual (Ver. 4.9)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan
Scope 2	Category 1 CO ₂ emissions from activities up to the manufacturing of raw materials, parts, purchased goods, and sales-related materials, etc. (hereafter goods purchased) Calculation methods: Based on the "Basic Guidelines on Accounting for Greenhouse Gas Emissions Throughout the Supply Chain (Ver. 2.5)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan, the emissions are calculated by multiplying the purchase price by the emission factor for "Pharmaceuticals" in "[5] Emission Factor Based on the Input-Output Table" in the "The Database on Emissions Unit Values for Calculation of Greenhouse Gas Emissions, etc., by Organizations Throughout the Supply Chain (Ver. 3.3)" of the Ministry of the Environment of Japan. The purchase price includes transportation costs associated with the purchase of purchased goods and does not include amounts related to the purchase of services other than the above.
	Category 2 CO ₂ emissions resulting from the construction and manufacturing of own capital goods Calculation methods: Based on the "Basic Guidelines on Accounting for Greenhouse Gas Emissions Throughout the Supply Chain (Ver. 2.5)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan, calculated by multiplying the acquisition cost of capital goods by the emissions factor for "pharmaceuticals" in "[6] Emissions factor per unit price of capital goods" in the "The Database on Emissions Unit Values for Calculation of Greenhouse Gas Emissions, etc., by Organizations Throughout the Supply Chain (Ver. 3.3)" of the Ministry of the Environment of Japan
Scope 3	Category 3 CO ₂ emissions resulting from procurement of fuels required for the generation of electricity purchased Calculation methods: Based on the "Basic Guidelines on Accounting for Greenhouse Gas Emissions Throughout the Supply Chain (Ver. 2.5)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan, calculated using "7. Emission Unit Values per Use of Electricity and Heat" in the "The Database on Emissions Unit Values for Calculation of Greenhouse Gas Emissions, etc., by Organizations Throughout the Supply Chain (Ver. 3.3)" of the Ministry of the Environment of Japan
	Other categories Total of Categories 4, 5, 6, 7 and 12, excluding Categories 8, 9, 10, 11, 13, 14 and 15 that are not included in our own corporate activities or are reported under other categories Calculation methods: Based on the "Basic Guidelines on Accounting for Greenhouse Gas Emissions Throughout the Supply Chain (Ver. 2.5)" of the Ministry of the Environment and the Ministry of Economy, Trade and Industry of Japan
Energy consumption	Total energy consumption Calculation method: Fuel is expressed as the sum of calories calculated using calorie conversion factors under the "Ordinance for Enforcement of the Act on Rationalizing etc. Energy Use" converted into MWh units with a rate of 3.6GJ per MWh. Note that calorie conversion factors disclosed by providers were used for town gas. Electricity is expressed as the sum of purchase volumes (MWh) without conversion to primary energy.
	Gasoline Amount of gasoline purchased, including fuel for sales force vehicles
	Other fuel oils Amount of kerosene, light oil, heavy oil A purchased
	Liquefied petroleum gas (LPG) Amount of LPG purchased from gas suppliers
	Liquefied natural gas (LNG) Amount of LNG purchased from gas suppliers
	Town gas Amount of town gas purchased from gas suppliers
	Electricity Amount of electricity purchased from power suppliers
	Steam Amount of steam purchased from steam suppliers

Third-Party Assurance of Environmental Data

Independent Assurance Report

To the Representative Director, President and CEO of Shionogi & Co., Ltd.

We were engaged by Shionogi & Co., Ltd. (the “Company”) to undertake a limited assurance engagement of the environmental performance indicators marked with “☑” (the “Indicators”) for the period from April 1, 2022 to March 31, 2023 included in its SHIONOGI INTEGRATED REPORT 2023 (the “Report”) for the fiscal year ended March 31, 2023.

The Company’s Responsibility

The Company is responsible for the preparation of the Indicators in accordance with its own reporting criteria (the “Company’s reporting criteria”), as described in the Report.

Our Responsibility

Our responsibility is to express a limited assurance conclusion on the Indicators based on the procedures we have performed. We conducted our engagement in accordance with the ‘International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements other than Audits or Reviews of Historical Financial Information’ and the ‘ISAE 3410, Assurance Engagements on Greenhouse Gas Statements’ issued by the International Auditing and Assurance Standards Board. The limited assurance engagement consisted of making inquiries, primarily of persons responsible for the preparation of information presented in the Report, and applying analytical and other procedures, and the procedures performed vary in nature from, and are less in extent than for, a reasonable assurance engagement. The level of assurance provided is thus not as high as that provided by a reasonable assurance engagement. Our assurance procedures included:

- Interviewing the Company’s responsible personnel to obtain an understanding of its policy for preparing the Report and reviewing the Company’s reporting criteria.
- Inquiring about the design of the systems and methods used to collect and process the Indicators.
- Performing analytical procedures on the Indicators.
- Examining, on a test basis, evidence supporting the generation, aggregation and reporting of the Indicators in conformity with the Company’s reporting criteria, and recalculating the Indicators.
- Visiting the Tokushima Plant of Shionogi Pharma Co., Ltd. selected on the basis of a risk analysis.
- Evaluating the overall presentation of the Indicators.

Conclusion

Based on the procedures performed, as described above, nothing has come to our attention that causes us to believe that the Indicators in the Report are not prepared, in all material respects, in accordance with the Company’s reporting criteria as described in the Report.

Our Independence and Quality Management

We have complied with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which includes independence and other requirements founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior. In accordance with International Standard on Quality Management 1, we design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Notes to the Reader of Independent Assurance Report:

This is a copy of the Independent Assurance Report and the original copies are kept separately by the Company and KPMG AZSA Sustainability Co., Ltd.

Glossary

Page*	Term	Explanation
2	SHIONOGI Group Heritage	SHIONOGI's corporate philosophy. Our basic policy and the foundation that makes up the core of all of our activities.
3	SHIONOGI Group Vision (2030 Vision)	SHIONOGI's vision for 2030 of "building innovation platforms to shape the future of healthcare."
4	HaaS	Stands for Healthcare as a Service. Refers to the Provision of a range of healthcare services in line with customer needs, rather than only the provision of pharmaceuticals.
4	HIV franchise	A product lineup that contains the anti-HIV drugs dolutegravir and cabotegravir discovered by SHIONOGI as components.
4	Royalties	Usage fees received by a company in accordance with the nature of the associated contract in return for permitting the use of intellectual property rights held by that company.
7	Clinical trials	Trials conducted to verify the effectiveness, safety and other aspects of candidate compounds, medical equipment, etc. as they apply to humans.
8	Total care	Care for ailments overall that includes pre-symptomatic, preventive, diagnostic and recuperative care in addition to treatment.
8	Wastewater surveillance service	Service for investigating the state of spreading of local infectious diseases by detecting pathogens in wastewater.
8	Gamma waves	A type of brain wave pattern that is mainly involved in the state of alertness, advanced brain activity, and the execution of cognitive functions.
9	Patent cliff	Refers to a considerable decline in sales caused by the replacement of pharmaceuticals with their generic counterparts once patents on the former expire.
9	ViiV Healthcare Limited	A specialty pharma firm in the HIV infection domain invested in by GSK, Pfizer and SHIONOGI.
10	Acute infectious diseases	Infectious diseases period between infection and the onset of symptoms is short and whose progress in symptoms is rapid.
10	Three major infectious diseases	Refers to HIV/AIDS, tuberculosis and malaria, which are all global concerns.
10	Infectious diseases requiring a long period of treatment	Includes infectious diseases, such as tuberculosis, which affect a patient for several years after onset, infectious diseases with a long period from infection to onset, such as HIV (human immunodeficiency virus), and infectious diseases that are difficult to distinguish between carrier and onset such as HBV (hepatitis B virus).
11	GARDP	Stands for the Global Antibiotic Research and Development Partnership. A Swiss-based NPO that develops new therapeutic drugs for infections caused by antimicrobial-resistant bacteria.
11	MPP	Stands for Medicines Patent Pool. Refers to an international non-profit organization established to improve access to medicines for infectious diseases such as HIV/AIDS, tuberculosis and malaria.
12	TCFD	Stands for Task Force on Climate-Related Financial Disclosures. An organization established to consider climate-related information disclosures and financial institutions' responses.
21	AMR	Stands for Antimicrobial Resistance. Indicates the decreasing effectiveness or ineffectiveness of antimicrobial drugs.
23	Multi-drug resistant	A state in which numerous antimicrobial drugs have limited effectiveness or are ineffective.
24	Small-molecule drug discovery engine	SHIONOGI's proprietary internal drug discovery system and expertise that enables us to bring forth innovative small-molecule pharmaceuticals with speed and efficiency.
24	Bacterial library	A stock of bacterial strains from past years that are used in R&D for new antimicrobial drugs and for other applications.

Page*	Term	Explanation
29	OTC drugs	General-use pharmaceuticals that can be purchased at a pharmacy, drugstore or other such location without a prescription. OTC stands for Over The Counter.
33	CHAI	Stands for Clinton Health Access Initiative. A global health organization that works towards saving the lives of people in low- to middle-income countries and mitigating the burden of illness.
33	WHO Model Lists of Essential Medicines	Refers to types of pharmaceuticals believed to be required in order to maintain modern healthcare standards as formulated by the WHO. Contains approx. 300 pharmaceutical articles as sample selections upon gathering important pharmaceuticals.
41	CDMO	Stands for Contract Development and Manufacturing Organization. An organization for pharmaceutical development and manufacture on consignment.
43	ADHD	Stands for Attention Deficit/Hyperactivity Disorder.
46	Antigen tests	Testing methods that detect particular proteins (antigens) on the target using antibodies of the target to be tested.
47	Qpex Biopharma, Inc.	A biotechnology company working on the discovery and development of new antimicrobials to combat drug-resistant bacteria.
47	BARDA	Stands for the Biomedical Advanced Research and Development Authority, which is based in the U.S.
48	100 days mission	An international goal to achieve the practical application of diagnostics, vaccines and therapeutics within 100 days of WHO's declaration of a "public health emergency of international concern."
48	KOTAI Biotechnologies, Inc.	A biotechnology company established based on research results at Osaka University. As a group of experts in information analysis of immunity and protein structure, the company conducts research and development in collaboration with many research institutes, universities, and pharmaceutical companies, etc.
50	Grünenthal	A pharmaceutical company focused on pain and related diseases working to improve the quality of life for people around the world and realize a pain-free world by providing innovative therapies and cutting-edge technologies.
51	Allm Inc.	A Japanese medical ICT company that aims to eliminate disparities and mismatches in healthcare through the power of ICT and realize fair medical welfare for all.
62	CMO	Stands for Contract Manufacturing Organization.
62	Continuous manufacturing	A system through which raw materials or mixtures thereof are continuously fed to the manufacturing process, and homogeneous, high-quality products are manufactured on an ongoing basis through production control and quality control methods that were appropriately configured based on scientific knowledge. This system can be expected to yield shorter development times, higher efficiency through manpower- and space-saving, and advanced quality assurance for pharmaceuticals.
66	MR	Stands for Medical Representative. Personnel who are in charge of medical information.

On the issuance of the SHIONOGI Integrated Report 2023

SHIONOGI publishes its integrated reports to provide our stakeholders with a better understanding of our efforts.

“SHIONOGI Integrated Report 2023,” our eighth edition issued, details efforts such as “business transformation” and “structural and process transformation” to achieve the medium-term business plan STS2030 Revision announced in June 2023, and explains “SHIONOGI’s employee transformation” from the perspective of human capital, which is the driving force behind these efforts, while incorporating it as a feature article. Furthermore, with regard to our response to SHIONOGI’s material issues, we have devised the report’s layout so that stakeholders can see the Group’s activities over the medium to long term, such as showing the progress of major initiatives and changes in indicators.

This report was produced with the cooperation of relevant organizations of SHIONOGI, with the Sustainability Management Department, Corporate Communications Department, and Corporate Planning Department playing a central role in discussions. As the senior executive officer responsible for the production of the report, I attest that the process of preparing the report is legitimate and that its content is accurate.

SHIONOGI will continue to evolve and grow as a company that pursues innovation, continuously challenges itself to create the future of healthcare, and contributes to solving social issues on a global scale. We hope that this report will help readers to better understand these efforts. We will continue striving to further enhance these reports so they will serve as an aid in dialogues with our stakeholders. Please give us your honest feedback and requests upon reading this report.

Engagement with Stakeholders

Approaching our diverse stakeholders

In order to reach out to a wide range of stakeholders, we focus on proactively disseminating information to the press and the public at large through our website, social media, and a variety of other tools. We are also working to enhance information for patients and their families, such as updating disease knowledge, treatment and support information on our website, and revamping various information pages in conjunction with the announcement of STS2030 Revision.

IR activities

In fiscal 2022, in addition to the regular financial results and the R&D Day, SHIONOGI held briefings on COVID-19-related products and HIV business, which are in particularly high demand, as well as briefings for individual investors. Through these various briefings and releases, SHIONOGI disclosed its strategies and progress toward achieving STS2030 and other initiatives as appropriate. In fiscal 2022, we also continued to actively engage in dialogue with investors in Japan and overseas.

Major IR Activities (FY2022)

- Number of dialogues with institutional investors and securities analysts: 514, of which 194 were handled by the Chief Executive Officer
- Briefings for investors and securities analysts: 12
