

FY2020 Financial Results

(April 2020 – March 2021)

May 10, 2021

Isao Teshirogi, Ph.D.

President and CEO

Agenda

- 1. Overview of FY2020 Financial Results (P.4-13)
- 2. Actions and Financial Forecasts in FY2021 (P.15-27)
- 3. Shareholder Return (P.29)

1. Overview of FY2020 Financial Results

Financial Results (Consolidated)

(Unit: B yen)

SONG

for you!

	FY2020		FY2019	Y on Y		
	Forecasts (Revised on Feb. 1)	Results	Achievement (%)	Results[*]	Change (%)	Change (B yen)
Revenue	301.4	297.2	98.6	333.4	(10.9)	(36.2)
Operating profit	122.9	117.4	95.6	130.6	(10.1)	(13.2)
Core operating profit**	97.7	94.0	96.1	127.4	(26.2)	(33.4)
Profit before tax	149.3	143.0	95.8	158.5	(9.8)	(15.5)
Profit attributable to owners of parent	113.7	111.9	98.4	122.2	(8.5)	(10.3)

- Sales and profits decreased due to shrinking of the pharmaceutical market by COVID-19 and exchange rate impact on royalty income
- Sales of domestic prescription drugs failed to meet revised forecast
- Aggressive investment in R&D and new businesses by redirecting sales activity costs

Exchange Rate (average)	FY2020 forecasts (Feb. 1)	FY2020 results	FY2019 results
USD (\$) – JPY (¥)	105.50	106.11	108.72

5

Main Variation Factors (Statement of Profit or Loss)

 Y on Y com 	naricon					
	parison	(Unit: B yen)				
Revenue		(36.2)				
Cost of sales		(4.3)				
Gross profit		(31.9)				
Selling general & administrative expenses		(3.2)				
R&D expenses		6.3				
Other income		22.1				
Other expenses		0.3				
Operating profit		(13.2)				
Core operating profit**		(33.4)				
Finance income		(4.0)				
Finance costs		(1.7)				
Profit before tax		(15.5)				
Profit attributable to owners of parent		(10.3)				
Decrease in profit Increase in profit						

Main Variation Factors (Y on Y)

- Revenue
 - Decrease in domestic prescription drugs business
 - Decrease in overseas business (US: one-time payment received in FY2019)
 - Decrease in royalty income

Cost of sales

- Increase in OTC and guasi-drugs and contract manufacturing revenue from the business combination of Nagase Medicals
- Decrease due to reduced prescription drug sales
- Selling general & administrative expenses
 - Decrease in visits to medical institutions and utilization of e-detailing

R&D expenses

- Aggressive investment in COVID-19-related projects
- Accelerating progress of 8 core projects*
- Other income
 - Gain on exchange of Shionogi Shibuya Building

Main Variation Factors (revised budget on Feb. 1)

- Revenue
 - Not achieved for domestic prescription drugs (-3.7 B yen)
- R&D expenses
 - Increased due to investment in core 8 projects (+2.3 B yen)

* See p.11 ** Operating income adjusted for one-time factors (impairment losses, gain on sale of property, plant and equipment, etc.)

Revenue by Segment

					(U	nit: B yen)	
		FY2020		FY2019	9 Y on Y		
	Forecasts (Revised on Feb. 1)	Results	Achievement (%)	Results[*]	Change (%)	Change (B yen)

5

Main Variation Factors (Revenue by Segment)

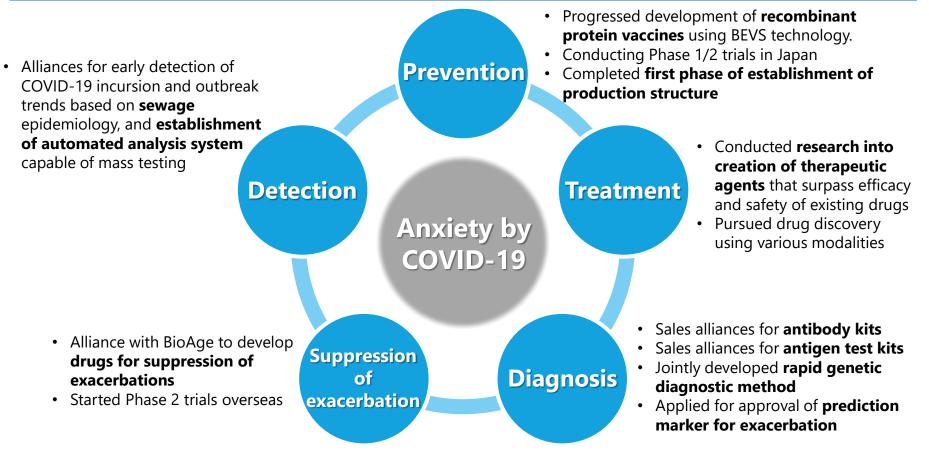

Actions and Achievements in FY2020 As a Leading Company in Infectious Disease

Action for total care of COVID-19

Aggressive resource commitment to contribute to the restoration of safety and security to society

5 O N G

for you!

Actions and Achievements in FY2020 **Promotion of R&D : Core 8 Projects**

SD	Pipeline	Indication	Initial target for FY2020	Status
Infectious disease	S-540956	HIV infection, cancer	Initiation of Phase 1 study in 4Q FY2020	Changed to 1Q FY2021
	S-600918	①Refractory chronic cough②sleep apnea syndrome	 ①Phase 2b topline results are anticipated in 1Q FY2021 ②Phase 2a topline results (Japan) are anticipated in 1Q FY2021 	①②On schedule
le:	S-637880	Neuropathic low back pain	Phase 2a topline results (Japan) are anticipated in 1Q FY2022	On schedule
Psycho- neurologic diseases	Signation zuranolone Depression I IS-812217] Depression I BPN14770 IAlzheimer's disease I		Depression	
-			 Initiation of Phase 2 study (Japan) in 2Q FY2021 Initiation of Phase 3 study in FY2Q 2021 	 ①Phase 2 study started in 1Q FY2021 (3M ahead of schedule) ②On schedule
	S-874713	Psycho-neurological diseases	Initiation of Phase I study in 4Q FY2020	Changed to 2Q FY2021
۲	S-531011	Solid tumor	Initiation of Phase I study in 2Q FY2021	On schedule
New growth areas	redasemtide [S-005151] (1) Epidermolysis bullosa (2) Acute stroke (3) Osteoarthritis (4) Chronic liver disease		 Preparing for application Phase 2 topline results (Japan) are anticipated in 3Q FY2021 Phase 2 in progress (Japan) (Investigator initiated clinical trial) 	①On schedule ②③④On schedule

Steady progress along with COVID-19-related projects, with some plans ahead of schedule*

Actions and Achievements in FY2020 Progress in Overseas Business

US and Europe: Maximized value of cefiderocol

- Promote both antimicrobial stewardship and infectious disease business growth
 - US: Additional indication approval and designation for NTAP*
 - Europe: Sales growth in 5 countries (UK, Sweden, Germany, France, and Austria)
 - > Adopted for subscription-type reimbursement model in the UK of up to £10 million per year per product (payment contracts to begin in April 2022)
 - > Started supply as a delinked incentive model with guaranteed minimum payment in Sweden.

China: Ping An-Shionogi's business transformation

- Completed establishment of Ping An-Shionogi (Hong Kong: Aug.2020, Shanghai: Nov.2020)
 - Pharmaceutical sales: Started to supply products via Ping An Group's online treatment platform

 New drug development: Advanced preparations for early approval of cefiderocol and naldemedine

Steady progress in Western and Chinese businesses

*NTAP was designed to encourage the utilization of new medical technologies in the hospital inpatient setting for Medicare patients

In COVID-19-related R&D, we were unable to respond to the expectations of society as a leading company of infectious diseases

In FY2021, Shionogi will continue its efforts to provide solutions related to COVID-19 and contribute to the restoration of the safety and security of society

2. Actions and Financial Forecasts in FY2021

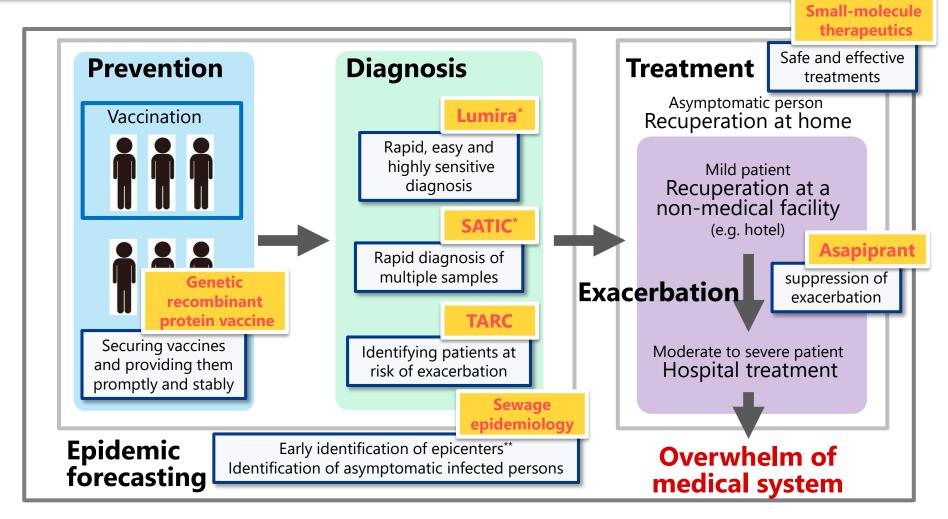

Shionogi will work intensively to counter the COVID-19 pandemic as our highest priority

S O N G

for you!

Current Issues and What Shionogi Wants to Achieve

Providing solutions for the overwhelmed medical system

SHIONOGI * See Appendix p.42 ** Epicenter: A center where many infected people gather and a large amount of virus is continuously discharged 16

As society's need for an early end to the pandemic grows ever greater, the business environment is changing at an unprecedented speed

Vaccines

Hopes for a purely domestic vaccine

- ⇒ Expectations for domestic vaccines due to prolonged COVID-19 and widespread epidemic of mutant virus
- ⇒ Active discussions on reviewing the existing approval system in case of emergency response (EUA*-like system, etc.)

🖡 Therapeutic drugs

Hopes for new drugs that can end the pandemic

- \Rightarrow Signs of changes in current treatment indicators (symptom improvement \Rightarrow viral load reduction, etc.)
- \Rightarrow Possibility of using a conditional early approval system, etc.

III Diagnosis

Diagnostic methods to reduce pressure on the medical system

- ⇒ Increasing need for diagnostics that allow patient triage, such as exacerbation markers
- ⇒ Expand to simultaneous diagnosis of flu and COVID-19

Epidemic detection and forecasting

Balancing infection control and economic activity

⇒ Increased focus on efforts to implement sewage epidemiology

SON G

Development and Stable Supply of Domestic Vaccines

Actions for the introduction of purely domestic vaccines

Development / production status

- **Conducting Ph1/2 trials in Japan**

 - Confirmed no major safety concerns
 Preparing for Ph3 trials to start by end of
- Production structure established
 - Moving to second phase of construction to increase production

Vaccine production facility newly established at UNIGEN

Key factors influencing launch date

Difficulty in conducting largescale clinical trials worldwide

Increasing debate about the flexible operation of the current approval system

Continue to build evidence, increase production, and discuss with regulators and ministries to allow availability later in CY2021

Development of Therapeutic Drugs with Superior Efficacy and Safety

Drug discovery power for antiviral drugs + modalities

- Changes in external environment surrounding COVID-19 drug development
 - While the development of therapeutic drugs is progressing using various modalities, the number of discontinuations / EUA cancellations is also increasing
 - > Antibody drugs, plasma fractionated drugs, etc.
 - The emergence of "a truly effective and safe drug" is still awaited

Shionogi's action

- Conducting drug discovery at top speed using various modalities
 Selecting promising compounds from multiple approaches
- With a view to addressing mutant virus, promising oral compounds from small molecule drug discovery were selected

A "therapeutic drug" is essential to ending the pandemic Start clinical trials during the first half

Suppression of Exacerbations in Asymptomatic Individuals and Mild Patients

Responding to exacerbation risk using existing assets

- BioAge began Ph2 trials of asapiprant
 - Asapiprant: discovered by Shionogi as S-555739
 - Prostaglandin D₂ DP1 receptor antagonist developed as allergic rhinitis drug; proven to be well tolerated and safe
 - Improvement of mortality rates in SARS-CoV-2-infected aged mice
 - Ph2 trials in the US, Brazil, and Argentina in elderly patients are ongoing
 - > Top line data expected to be obtained in 2021
 - Decision on domestic development based on overseas clinical trial results

Promptly provide a solution to eliminate patient anxiety along with therapeutic drugs^{*}

Identify Patients at Risk of Exacerbation

SONG for you!

Diagnostic markers that can predict exacerbation

HISCL[®] TARC^{*} reagent

- It is difficult to ascertain patients who have the risk of exacerbation in the early stages of COVID-19, and the risk of healthcare system collapse due to increased patient hospitalization and isolation is a concern for society
 - > Measurement of serum TARC levels in COVID-19-positive patients enables focus on patients who are at risk of exacerbation, thus optimizing use of medical resources
 - > Highly specific markers that can be assessed even in patients with underlying disease

Filed application for approval for additional indication for use in prediction of risk of exacerbation (April 16, 2021)

Contributing to reduce the risk of collapse/overwhelming of medical system

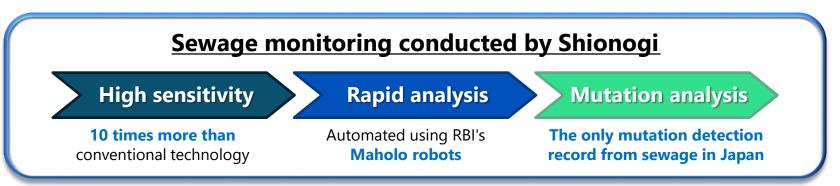

* TARC (thymus and activation-regulated chemokine) One of the chemokines driving migration of Th2 cells, a type of lymphocyte, to the site of inflammation 21

Early Prediction of Pandemic

Establishment of analysis system for SARS-CoV-2 in sewage

- Periodic monitoring of SARS-CoV-2 accumulation in sewage treatment plants and facility sewage makes it possible to obtain epidemiological information at the population level
- Collaboration with Hokkaido University, RBI*, and iLAC to facilitate assessment of how COVID-19 is spreading and when an outbreak starts and will end, as well as early detection of trends in the proliferation and emergence of mutant virus
- Started monitoring viral loads and genetic analysis in Osaka Prefecture since April
- Service set to be launched in mid-June

Expected to contribute to both infection control and resumption of economic activities

To Avoid Continual Social Anxiety Caused by Infectious Diseases

Strengthen preparations for the next pandemic

- Accurate prediction of pandemics is difficult (COVID-19, flu, etc.)
- While the spread of COVID-19 has certainly raised public awareness of infectious diseases, crisis management for the next pandemic remains insufficient

Infectious disease control is an important issue closely related to national security

- Industry, government, and academia can work together to strengthen preparedness
- A framework is needed to prepare for emergencies arising from infectious diseases

Preparation of Shionogi

- Strengthening our actions in the infectious disease field as a core therapeutic area, and developing a business that offers total care
- Policy recommendations and contributions to global health through industry activities
 - Stable operation of infectious disease business

Business Plan in FY2021

In addition to the COVID-19-related business, which is expected to undergo rapid evolution^{*}, 2021 will be a year with abundant new business opportunities

Expand infectious disease-related business

- **Providing COVID-19 related products and services:** Changes due to development, policies, etc.
- Changes in each country's response to prepare for emergencies such as flu and AMR, etc.
 - Possibility of expansion of stockpiling, subscription model, etc.
 - Creation of new healthcare-related business

Establish a new business model for infectious diseases

Acquire new growth drivers

- Product introduction, M&A
- Aggressive investment for early expansion of new business
- Maximization of assets and franchises, consideration of partnering

Expansion of new business Creating new revenue opportunities

Start by strengthening the base business, and grow sales and profits by creating and expanding new businesses

3. Shareholder Return

Flexible and Prompt Capital Strategy

- Shareholder return policy through which shareholders can feel our growth
 - Enhance capital efficiency through share buybacks, cancellation of treasury shares, and unwinding of cross-shareholdings
 - > Plan to increase dividend again in FY2021 for the tenth consecutive year

SONG

for you!

As a leading company in the infectious disease field

Shionogi will work intensively to counter the COVID-19 pandemic as our highest priority

Material issues to create new value for customers and society

Protect people worldwide from the threat of infectious diseases

- Develop infectious-diseaserelated products and accurately convey associated information
- Address AMR/viral infectious diseases (influenza, corona, etc.)
- Address three major infectious
- diseases (HIV, TB, malaria)

5 O N G

Business Impact of COVID-19

Impact of COVID-19 on 3Q FY2020 and Our Response

• Supply chain

- Continue to procure overseas imported raw materials ahead of schedule and secure inventories, and increased monitoring of manufacturing of active pharmaceutical ingredients (APIs) and products by suppliers and CMOs ⇒ Achieve stable supply for the full year
- Raw materials ordered ahead of schedule are delivered in 4Q, reducing risk for stable supply

Promotion

- Domestic: Opportunities to face-to-face meetings with physicians at large hospitals are reduced by about 50% compared to before COVID-19
- Domestic: Providing information virtually, in an efficient manner, through webconferences and e-details, in combination with face-to-face or online meetings, depending upon the needs of each medical institution
- Overseas: Providing information and promoting antimicrobial stewardship by virtual communications on cefiderocol

R&D

- Resources allocated for the realization of total care of COVID-19 with therapeutic drugs, vaccines, and diagnostics
- Core 8 projects^{*} progressed almost as planned without major delays^{**} even in COVID-19 situation
- CMC: Completed the first phase of vaccine production as planned and moved to the second phase

Providing New Diagnostic Methods Meet Medical Needs

Rapid and highly sensitive antigen test

LumiraDx SARS-CoV-2 Ag Test Strip*

- An antigen test that overcomes the issues of **speed** in PCR test and **sensitivity** in antigen test
 - > Diagnostic results similar to those from PCR can be easily obtained in 12 minutes from a drop of nasopharyngeal/nasal swab fluid
 - > Preparing to start sales by the end of May 2021
 - > Widely applied to other infectious diseases with the same device

Rapid diagnosis of multiple samples

• SATIC*

Technology that can visually disclose the infection in about 25 minutes using saliva samples

- > Ongoing product development to provide genetic diagnostic kits capable of highly sensitive and rapid diagnosis
- > Under discussion with collaborative research partner on a method that can test with multiple samples

** SATIC : Signal Amplification by Ternary Initiation Complexes

Providing New Value by Ping An-Shionog

FY2021 action

• Strengthen sales alliances with online medical platforms

Expand product range

- > Increased range of C&O products and Shionogi Healthcare's products
- > Introducing products (GE, OTC) suited to online prescription

Expand sales channels

> Develop new offline and online sales networks

Maximize value through use of RWD*

- Provide wearable devices to patients when certain products are prescribed, adding post-prescription follow-up function to online medical care
 - = Along with supporting compliance and proper use, collect data for AI drug discovery by monitoring drug efficacy.

New drug development

Cefiderocol, naldemedine

- A pre-NDA meeting will be held in 1H of FY2021 with the aim of filing a Chinese NDA application within the year.
- Contribute to profits from FY2022

Providing new value by Ping An-Shionogi SONG for you!

Actions for Medium to long term increase in corporate value

Al drug discovery research

- Use AI technology to search for candidate compounds that broadly act on the target genes in specific CNS diseases
 - Narrowed candidates down from 500,000 or more to about 100
 - Aiming to start non-clinical trials by end of FY2021

Smart factories

- Apply AI technology to pharmaceutical manufacturing to automate manufacturing and quality management
 - Steady progress toward implementation
 - Completed characterization of risk of deviation in weighing process

Accelerate contribution to revenue through use of online medical treatment platforms, creation of new drugs and realization of HaaS

Actions and Achievements in FY2020 Building a foundation for new value creation

Pursued advanced decision making and cost structure reform

Education and training for all managers: Project KANAME

 Understanding of new medium-term management plan 2) Approval process
 Management and personnel evaluation 4) Labor management

Developed human resources as a source of competitive advantage

- Improve motivation and collaboration
- Develop human resources who can take on challenges in the realization of HaaS

Advanced decision making based on management and business strategies

- Increase understanding of strategy throughout the managerial organization
- Decision-making based on assessment of business risk, at the proper level

Improvement of concrete aspects

- Establishment of a system that ensures transparency and traceability in decision making.
- Tight linkage with management accounting

Visualize and deeply consider resource utilization

Actions in FY2020 Realization of growth phase through cost structure reform

Software and hardware reforms implemented in FY2020

Capability to add future businesses For current businesses Focus that ensures a high rate of return Invest to generate a high rate of return Ability to adjust and manage Variable Variable costs priorities within the budget Ability to turn fixed costs costs depending on the progress of into variable costs and the business create new highlyprofitable businesses Fixed costs Fixed cost

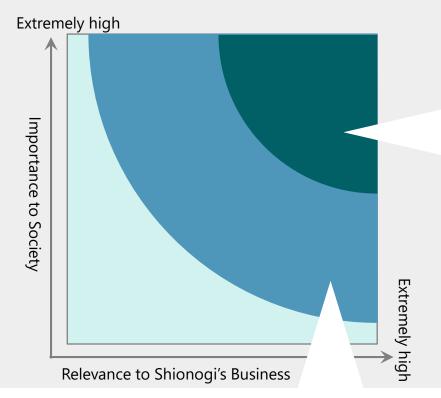

Through cost transparency and advanced decision-making, make it possible to release investment capacity for new growth while reducing costs

Material Issues to Be Tackled by Shionogi

Material issues determined in light of external/internal changes in environment

·Improve access to healthcare ·Strengthen corporate governance

- Secure human resources to support growth
- Protect the environment
 Ensure compliance
- Supply socially responsible products and services
- Reinforce supply chain management
 Respect human rights

- Protect people worldwide from the threat of infectious diseases
 - Develop infectious-disease-related products and distribute accurate information about them
 - Big three infectious diseases (HIV, TB, malaria)
 - AMR/viral infectious diseases (influenza, corona, etc.)
- Improve social productivity and extend healthy lifespans
 - Contribute to raising social productivity (chronic back pain, depression, etc.)
 - Contribute to the ultra-aged society (dementia, cancer, etc.)
- Contribute to sustainable social security
 - Provide medical care optimized for the individual
 - Deliver at suitable prices that are commensurate with value

SDGs that Shionogi can help to achieve

Forward-Looking Statements

- Forecast or target figures in this material are neither official forecasts of earnings and dividends nor guarantee of target, achievement and forecasts, but present the midterm strategies, goals and visions. Official earnings guidance should be referred to in the disclosure of the annual financial report (*kessan tanshin*) in accordance with the rules set by Tokyo Stock Exchange.
- Materials and information provided during this presentation may contain so-called "forward-looking statements". These statements are based on current expectations, forecasts and assumptions that are subject to risks and uncertainties which could cause actual outcomes and results to differ materially from these statements.
- Risks and uncertainties include general industry and market conditions, and general domestic and international
 economic conditions such as interest rate and currency exchange fluctuations. Risks and uncertainties particularly
 apply with respect to product-related forward-looking statements. Product risks and uncertainties include, but are
 not limited to, technological advances and patents attained by competitors; challenges inherent in new product
 development, including completion of clinical trials; claims and concerns about product safety and efficacy;
 regulatory agency's examination period, obtaining regulatory approvals; domestic and foreign healthcare reforms;
 trend toward managed care and healthcare cost containment; and governmental laws and regulations affecting
 domestic and foreign operations.
- For products that are approved, there are manufacturing and marketing risks and uncertainties, which include, but are not limited to, inability to build production capacity to meet demand, lack of availability of raw materials, and failure to gain market acceptance.
- Shionogi disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
- This material is presented to inform stakeholders of the views of Shionogi's management but should not be relied on solely in making investment and other decisions.
- You should rely on your own independent examination of us before investing in any securities issued by our company. Shionogi shall accept no responsibility or liability for damage or loss caused by any error, inaccuracy, misunderstanding or changes of target figures or any other use of this material.
- This English presentation was translated from the original Japanese version. In the event of any inconsistency between the statements in the two versions, the statements in the Japanese version shall prevail.
