

Fiscal 2024 Financial Results

May 12, 2025

Shionogi & Co., Ltd.

SHIONOGI

Agenda

01

Overview of FY2024 Financial Results

(P.3-13)

02

Main Activities of STS2030 Revision Phase 2

(P.14-32)

- ◆ Changes to STS2030 Revision Phase 2 KPIs
- ◆ Business investments aimed at new growth
- ◆ Growth of Existing Business
- ◆ Progress in pipeline

03

FY2025 Financial Forecasts and Shareholder Return

(P.33-39)

Overview of FY2024 Financial Results

SHIONOGI

Highlight

Revenue and operating profit have reached **a record high for the third consecutive term**

Topline (B yen)

Operating profit (B yen)

Summary of FY2024 Financial Results

// Compared to the previous year

- Absorbed the impact of last year's one-time payment*1 (25 billion yen) and achieved increased revenue and profits
- The HIV and overseas businesses are growing strongly

// Compared to the forecast

- Revenue and various profit items did not reach the forecast
- The wave of winter COVID-19 is significantly lower than our company's expectations

Statement of Profit or Loss

(Unit: B yen)

Variation Factors (Y on Y)

Revenue

↑ The HIV business and overseas business continue to grow strongly

↓ Prescription drugs

Cost of Sales

↓ Explain the details on the next page (Cost of Sales, Selling, general & administrative expenses, R&D expenses total)

- Costs related to implementation of early retirement program*2

Other income & expenses

↑

- Impairment loss related to development projects*2

| | FY2024 | | | FY2023 | | Y on Y | |
|--|--------------------|---------|----------------|---------|------------|--------|--|
| | Forecast Full year | Results | Achievement(%) | Results | Change (%) | Change | |
| Revenue | 460.0 | 438.3 | 95.3 | 435.1 | 0.7 | 3.2 | |
| Cost of Sales | 14.6 | 14.6 | | 13.2 | | | |

Details of Cost Increases (Y on Y)

Major cost increases (Y on Y)

Cost of sales: +6.2 B yen
SG&A expenses: +2.7 B yen
R&D expenses: +6.0 B yen

Total increase
14.9 B yen

Cost of sales

- From FY2022 onwards, we have increased production and made investments in facilities in response to the expanding demand for antibiotics and other products
⇒The cost in relative terms has increased significantly for the FY2024
- Changes in product composition in relation to sales
- Increase in raw material and manufacturing expenses during the period

SG&A and R&D expense

- COVID-19 awareness activities and sales expenses for Xocova
- Acceleration of the development of acute respiratory infection drugs (COVID-19, RSV)
- Expansion of the U.S. research center and promotion of Qpex development products
- Preferential investment in late-stage development products

Revenue by Segment

(Unit: B yen)

Variation Factors (Y on Y)

| | FY2024 | | | FY2023 | | Y on Y | |
|-------------------------------------|--------------------|--------------|----------------|---------|---------------|---------------|--|
| | Forecast Full year | Results | Achievement(%) | Results | Change(%) | Change | |
| Prescription drugs | 124.7 | 98.8 | 79.2 | 151.1 | (34.6) | (52.4) | |
| Excluding temporary income | - | 98.8 | - | 126.1 | (21.7) | (27.3) | |
| Overseas subsidiaries/export | 57.6 | 59.1 | 102.6 | 49.9 | 18.4 | 9.2 | |

*¹ Including temporary income from transfer of ADHD drugs *² This product's sales are only recorded in the 2023 fiscal year results

Progress of HIV Business by ViiV (FY2024)

The HIV business is experiencing strong growth due to the expansion of the oral two drug regimens*¹ and LA*² formulations

Sales of ViiV's HIV products*³

Transition of SHIONOGI's HIV royalty income*⁴

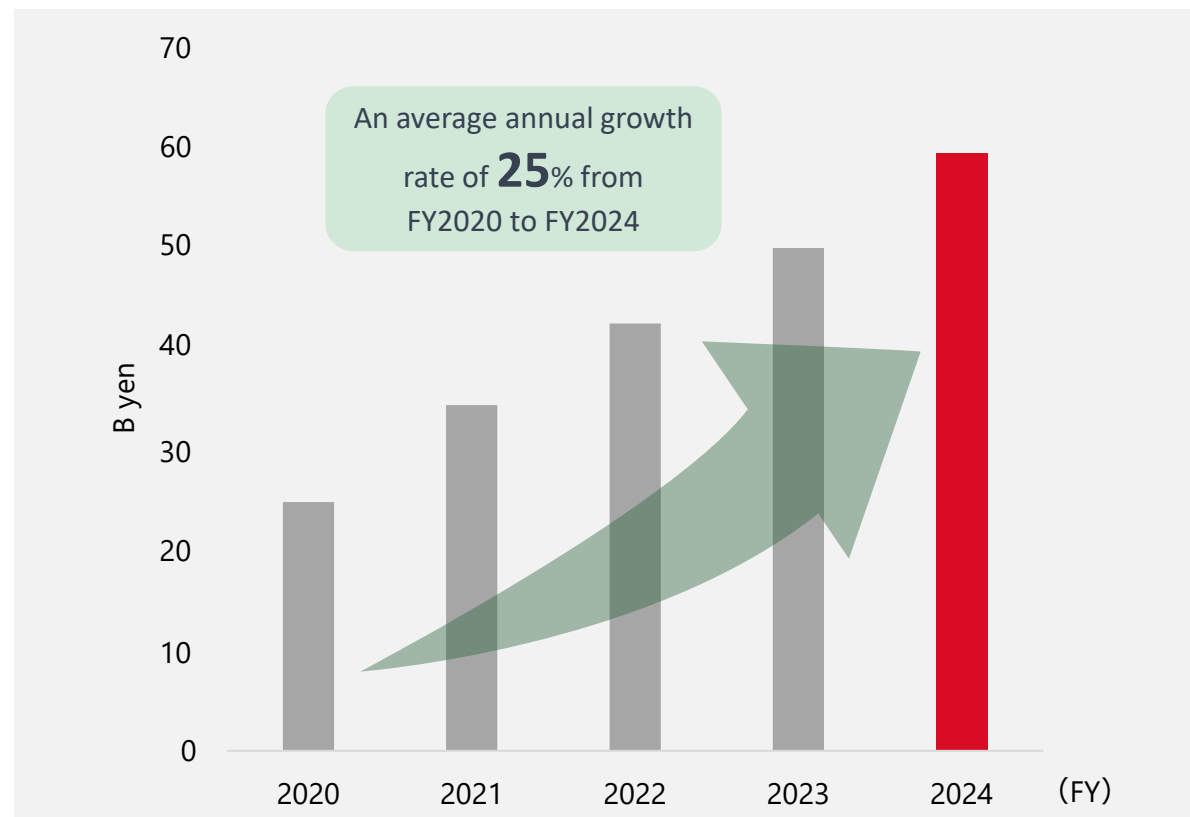

*¹ Oral two drug regimens: Dovato, Juluca *² Long Acting: Cabenuva, Apretude *³ Source: Prepared by SHIONOGI based on GSK financial statements *⁴ The additional royalties from the settlement between ViiV Healthcare, GSK, Shionogi and Gilead in Q4 2021 are not included

Progress of Overseas Business (FY2024)

The overseas business has achieved a record high for the fourth consecutive term, due to the stable growth of cefiderocol

Revenue of overseas subsidiaries/exports

Summary of FY2024

Global expansion of cefiderocol

- Approved
 - Korea: Feb. 2025
 - NDA submission was accepted
 - China: Sep. 2024
 - Australia: Dec. 2024
- Start to sale
 - Taiwan: Mar. 2025

Advancements in the US and Europe

- US: Expansion of sales area
- Europe: Expansion of sales countries
 - Growth in Eastern Europe and further expansion into other regions

Progress of Domestic Business (FY2024)

**With two infectious disease drug assets,
the acute respiratory infection business contributes steadily to performance throughout the year**

Progress of Main Pipelines for the Current Fiscal Year (FY2024)

Multiple pipelines are making steady progress, achieving various approvals and submissions for approval

| Infection diseases | | QOL diseases with high social impact | |
|---|--|---|--------------------|
| S-268019 COVID-19 vaccine | Approved in Japan | ENDEAVORRIDE ADHD (pediatric) | Approved in Japan |
| Ensitrelvir COVID-19 Post-Exposure Prophylaxis | Submitted in Japan Rolling submission started in US | Zuranolone Depression | Submitted in Japan |
| S-268024 COVID-19 vaccine | Phase 3 started | SDS-881 Dementia (AI program for cognitive function testing) | Phase 3 started |
| S-337395 RSV infections | Achieved primary endpoint in Phase 2 trial | SASS-001 Sleep Apnea with a Central Component | Phase 2 started |
| S-892216 COVID-19 treatment (Oral) | Phase 2 started | Zatolmilast Jordan syndrome*1 | Phase 2 started |

*1 Phase 2/3 trial for zatolmilast in the treatment of fragile X syndrome is ongoing

Results for FY2024

Achieved growth surpassing last year's one-time payment (25B yen) and achieved increased revenue and operating profit

The topline and operating profit has reached a record high

- **HIV Business**  **+44.6**B yen (Y on Y **+22.8%**)
- **Overseas Business**  **+9.2**B yen (Y on Y **+18.4%**)

The financial results did not meet the full year forecast

- Implemented strict cost management in the second half, but the winter COVID-19 surge significantly undershot our company's expectations
- Continue to invest in necessary activities for future growth

Continued proactive investment in growth drivers

- Based on the results of the clinical trials, a reassessment of priorities will be made
- Initiate Phase 2 and Phase 3 of the next-generation development products

Main Activities of STS2030 Revision Phase 2

- ◆ Changes to STS2030 Revision Phase 2 KPIs
- ◆ Business investments aimed at new growth
- ◆ Growth of existing business
- ◆ Progress in pipeline

SHIONOGI

Changes to KPIs in "STS2030 Revision Phase 2"

**Although the main KPIs of STS2030 Revision Phase 2 have been revised downward,
FY2025 will be a year of significant growth**

| | FY2024 Results | FY2025 Previous Targets*2 | FY2025 New Targets |
|---|--------------------|------------------------------|---|
| Revenue | 438.3 B yen | 550.0 B yen | 530.0 B yen |
| EBITDA | 179.3 B yen | 200.0 B yen | 196.0 B yen |
| Overseas sales CAGR*1 <small>Starting from FY2022</small> | 17.9 % | 50 % | Reviewed the growth plan ⇒Consequently, we plan to reset our KPIs to align with anticipated growth in the coming fiscal years |

Background of New KPI Setting

Progress of major businesses is smooth towards achieving Phase 2 KPIs and realizing the 2030 Vision

| | <u>Initial assumptions</u> | <u>Current Progress</u> |
|---------------------------------|---|--|
| Overseas subsidiaries/exports | <ul style="list-style-type: none">Global expansion centered on in-house developed infectious disease drugs | <p>Ensitrelvir</p> <ul style="list-style-type: none">Delay in the start of sales in the US due to the failure to meet the primary endpoints of the SCORPIO-HR trial⇒Accelerate global expansion starting with US approval based on favorable results from the SCORPIO-PEP*1 trial <p>Revenue from overseas subsidiaries/exports</p> <ul style="list-style-type: none">Achieved an average annual growth rate of 25% between fiscal years 2020-2024 <p>⇒Steady growth centered on in-house sales of cefiderocol</p> |
| HIV business | <ul style="list-style-type: none">Expansion of sales of new products (LA formulations, oral 2-drug regimens) | <ul style="list-style-type: none">Sustained stronger-than-expected growth <p>Development of next-generation growth drivers is progressing smoothly</p> |
| New products and new businesses | <ul style="list-style-type: none">Growth towards realizing the 2030 Vision through aggressive investment (R&D, business investment) | <ul style="list-style-type: none">Acquired new revenue base through M&A <p>Continue to make aggressive investments based on priorities</p> |

For Achieving STS2030 Revision Phase 2

We will achieve the KPIs for FY2025 through "growth investments" and "growth in existing businesses"

Growth Factor of Topline

// Growth investments

- Recording revenue from M&A activities.
 - Revenue from JT Group's Pharmaceutical Division

// Growth in existing businesses

- Further growth in the HIV business
- Improvement in COVID-19 treatment rates and overseas expansion of Xocova
- Stable growth of Cefiderocol
- Expand of Quviviq revenue
- Launch of two new products (ENDEAVORRIDE and Zuranolone)

Growth
investments

Growth investments aimed at realizing our 2030 Vision

Through the M&A of JT Group's Pharmaceutical Division, SHIONOGI has strengthened our R&D capabilities as well as our domestic product assets

JT Pharmaceutical Division

- Discovery of drug candidates through to preclinical research
- Strategic planning and domestic clinical development
- Regulatory affairs and post-marketing safety information collection
- Partnering and Alliance management

TORII PHARMACEUTICAL CO., LTD.

- Partnering management
- Japan sales
- Medical affairs
- Alliance management

Nihonbashi, Tokyo

Takatsuki City, Osaka

Yokohama City, Kanagawa

Akros Pharma Inc,

- Overseas clinical development
- Overseas collaborative research and exploration of new technology projects

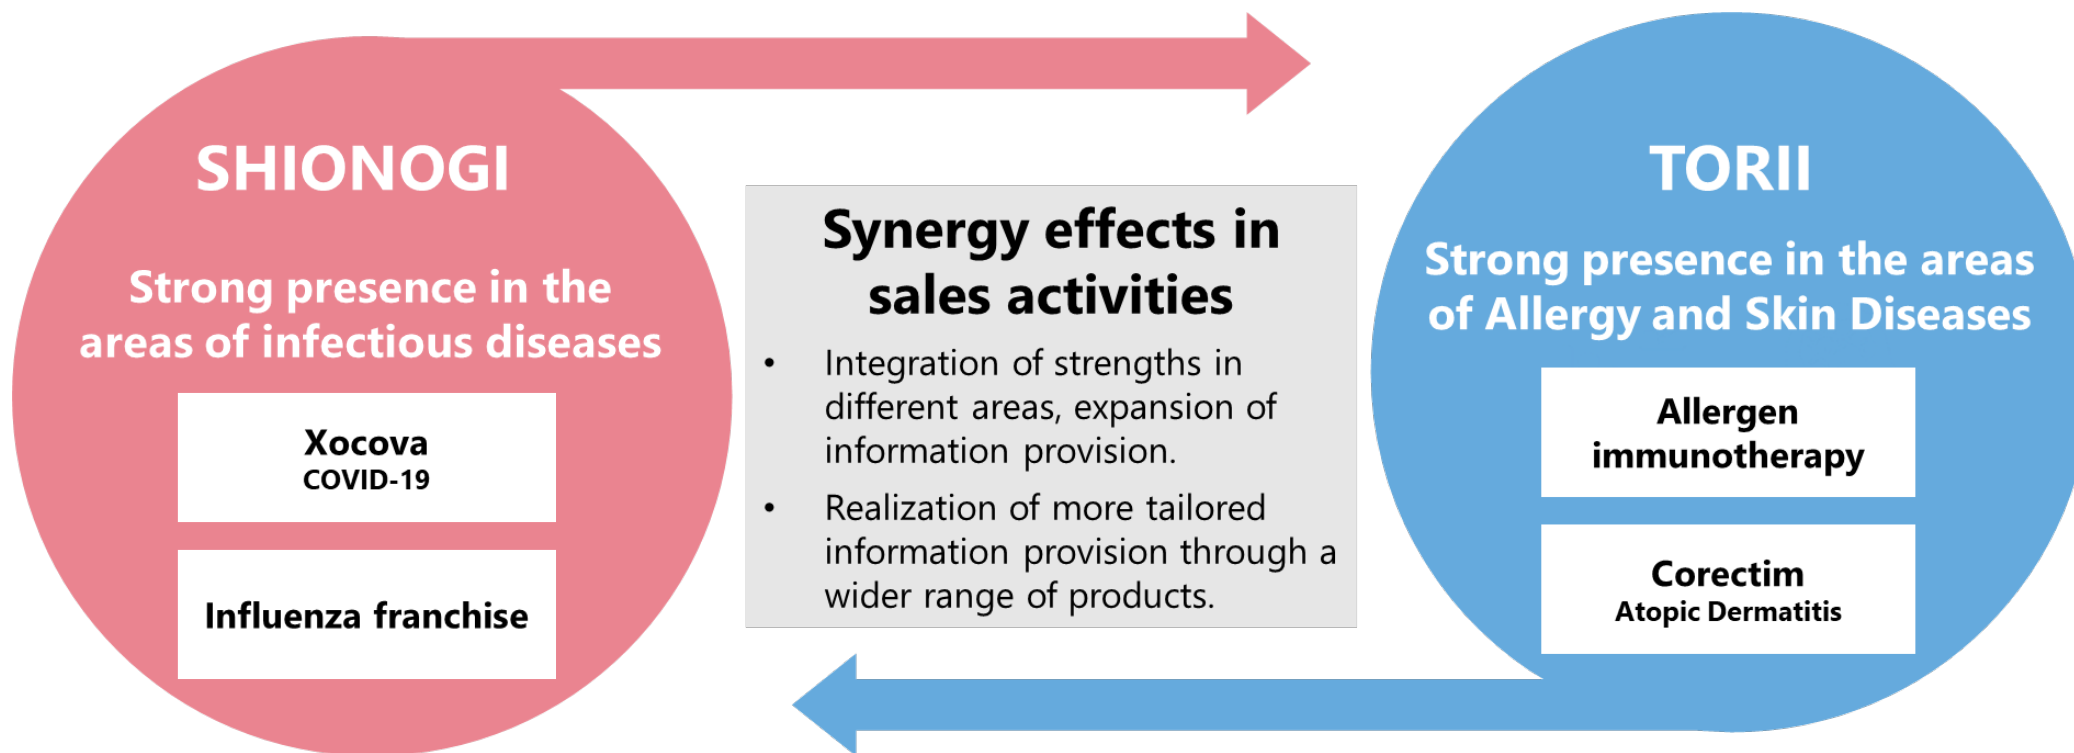

Princeton, New Jersey, USA

Maximizing the value of domestic product assets

Expansion of information activities to provide products that meet patient needs

The launch of new products that both companies should focus on

Vtama

Atopic Dermatitis/Plaque psoriasis

October 2024 launch

Quviviq

Insomnia

December 2024 launch

Zulanolone

Depression

Scheduled for approval in FY 2025

Growth Outlook for the HIV Market (Treatment + Prevention)

Existing
businesses

In the treatment and PrEP*¹ market, LA formulations will continue to drive growth

Outlook for the HIV Market*² (Treatment + PrEP)

The core of the HIV market will continue to be the **treatment market**

// Treatment

- In the US, new infections have increased by approximately 2.5-3% in recent years*³
- The market size will be stable even after the launch of oral GE drugs
- **LA formulations, including integrase inhibitors**, will continue to be mainstream
 - LA injectables are expected to represent approximately **~30%** of the total by 2031

// PrEP

- In the US, currently about one-third of potential candidates (approximately 1.2 million people) are receiving PrEP medications*⁴
- With the penetration of LA formulations, the overall PrEP market is expected to expand
 - LA injectables are expected to represent approximately **~80%** of the total by 2031
- LA integrase inhibitors are also expected to be an important option in the PrEP market, potentially taking over the substantial majority of the market if reimbursement is sufficient.

Outlook for HIV Business by FY2025

Existing
businesses

Data on the LA formulations has been accumulating as LA contributes increasingly to HIV business growth

Real World Evidence at CROI 2025 ^{*1, 2}

// Cabenuva

High adherence and long-term efficacy in clinical practice

One-year continuation rate of Cabenuva treatment

Approximately **80%**

Percentage of participants with ultimately suppressed virus

Approximately **95%**

// Apretude

High selectivity and efficacy in clinical practice

Percentage of participants who voluntarily chose Apretude (vs oral)

Approximately **83%**

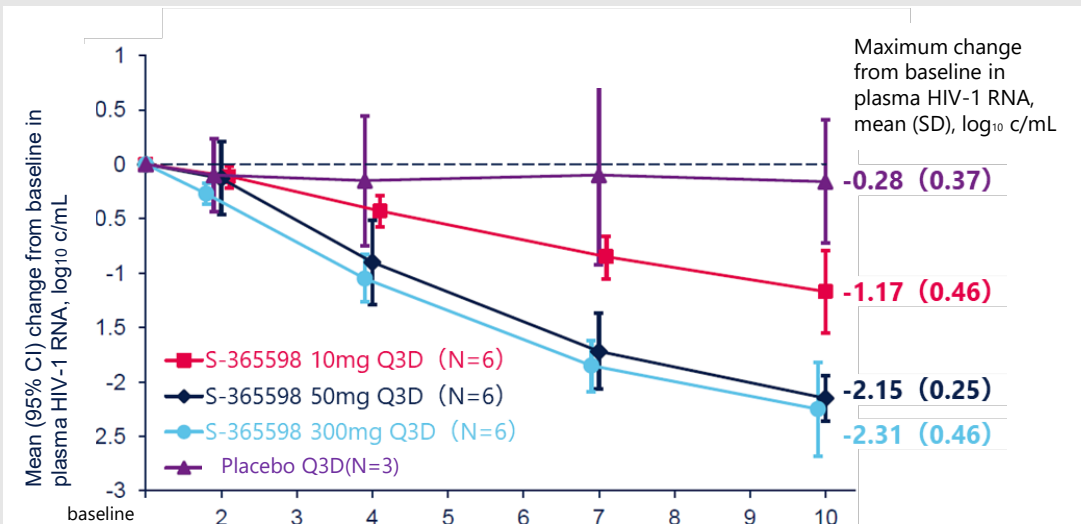

Number of new HIV infections during the follow-up period

0 cases

Phase 2a trial data for S-365598 (oral) ^{*3, *4}

// S-365598

Acquired PoC for the first time in HIV patients

- Confirming equivalent efficacy to dolutegravir
- No drug resistance mutations were observed, and there are no concerns regarding tolerability and safety
- Currently conducting Phase 1 trials of the long-acting formulations (injectable) to evaluate pharmacokinetics, etc.

^{*1} Conference on Retroviruses and Opportunistic Infections ^{*2} [ViiV Healthcare Press release and ViiV Healthcare Press release](#) ^{*3} Conference on Retroviruses and Opportunistic Infections; March 9-12, 2025; San Francisco, Announced by ViiV Healthcare in California (Luise Rogg et al) ^{*4} For information on an overview of the Phase 2a trial, please refer to 46

Growth of Xocova in Japan

Continue to promote initiatives to improve the treatment rate of COVID-19

| Variable Factor | FY2023 | FY2024 | FY2025 |
|---|---------------------------------------|---------------------------------------|-----------------------------------|
| Number of positive confirmed case | Annual average of fixed points 8.0 | Annual average of fixed points 5.2 | Assuming the same level as FY2024 |
| Average Share Xocova | Approximately 50% | Approximately 65% | ↑ |
| Treatment Rate*1 Average value of the most prevalent month | 21.4% | 13.1% | >20% |

- Number of infected individuals: FY2024 saw relatively fewer infections, especially during the winter season
- Share: FY2024 experienced significant growth in market share
- Treatment rate: FY2023 had a high treatment rate due to public funding for treatment costs*2

22 *1 Treatment rate with oral antiviral drugs, created by our company from JAMDAS data
*2 April to September 2023: No out-of-pocket expenses due to full public funding, October 2023 to March 2024: Out-of-pocket expenses of 6,000 to 9,000 yen depending on the out-of-pocket percentage

*3 The total from October 2023 to December 2024
*3 National Institute of Infectious Diseases, Infectious Disease Surveillance Weekly Report Download 2024 (Calculated and plotted based on the data accessed on January 16, 2025)

*4 The total from May 2023 to August 2024 is also included.
*4 The Ministry of Health, Labour and Welfare's Vital Statistics Survey Summary (accessed on January 16, 2025) was also referenced.

Characteristics of QUVIVIQ and the Insomnia Market

Maximize product value early to address unmet needs in the field of insomnia

QUVIVIQ

Insomnia treatment (Launched in December 2024)

Improvement
of insomnia
symptoms

+

Improvement
of daytime
functioning^{*1}

Unmet needs in the insomnia area

Nocturnal
awakenings

Rapid sleep
onset

Carry-over effects
to the next
day after
medication

Market size of insomnia treatments^{*2}

Non-orexin
receptor antagonists

**Sales of insomnia
treatments**
Approximately
109.2B yen
(annual)

Orexin receptor
antagonists

approximately 74%

Japan is one of the largest markets for orexin receptor antagonists in the world^{*3}

Launch of Zuranolone and ENDEAVORRIDE

Accelerate the growth of our business in Japan through the launch of innovative new products

ENDEAVORRIDE

Digital therapeutic App for pediatric patients with ADHD
(FY2024: Manufacturing and marketing approval obtained)

Pediatric ADHD market (estimate)

0.6M people

Potential number of patients

- A new option of **program medical devices** that can improve ADHD*¹ symptoms

Zuranolone

Depression treatment

(FY2025: Scheduled for manufacturing and marketing approval)

Depression market (estimate)

5M people

Potential number of patients

- **No dosage adjustment needed**, and effectiveness determined in **two weeks**
- Contributing to the unmet need for **early treatment** in depression patients

Outlook for Overseas Business

Existing
businesses

Promote appropriate use and further expand global access to cefiderocol

// US

- Strengthen information provision activities
- Expand sales regions

// Europe

- Penetration in existing markets
- Further expansion in our sales country
- Expansion of global access through promotion of partnering

- Shionogi B.V.
- GARDP•CHAI*¹
- With Sobi*²

// Asia and other regions

Leverage partners to expand into new markets

Already launched countries/regions

Japan, Taiwan

Expand sales in approved countries

- China
- Korea
 - Execution of Sublicense Agreement with JEIL*³
- Australia
 - Exclusive Licensing Agreement with Link Healthcare*⁴

Existing
businesses

Future Business Development in China

Under the new structure as Shionogi (China) Co., Ltd., we will accelerate the development of our new drug business in China

**FY2025-
Launch of New Drug Business**

**FY2027-
Accelerating growth**

**FY2030-
Establishing a solid
foundation for China business**

// Cefidelocol

**Establishing a foundation for the
new drug business**

Large market
potential

Number of
patients*:
600,000

Efficient
engagement with
core targets

Nationwide
coverage through
partnering

**Aiming to make it a key revenue
driver, as in the US and Europe**

// Additional pipeline products

**Expected to contribute to growth
from FY2027 onward**

Naldemedine

✓ Approval expected
in FY2026

Olorofim

✓ Phase 3 Trials

Ensitrelvir

✓ Preparation for
Submission

AI-driven drug discovery
✓ Investigator-Initiated
Clinical Trials

**Strategic use of partnerships based on
market characteristics**

Main Activities of STS2030 Revision Phase 2

- ◆ Changes to STS2030 Revision Phase 2 KPIs
- ◆ Business investments aimed at new growth
- ◆ Growth of Existing Business
- ◆ Progress in pipeline

SHIONOGI

Global Expansion of Ensitrelvir

Accelerating global rollout based on positive results from the SCORPIO-PEP study

- Phase 3 Trial Results of Ensitrelvir (SCORPIO-PEP)-

- Development status by country-

// United States

- Initiated a submission to the FDA for approval of the prophylactic indication (rolling submission)
- Ongoing discussions toward submission for treatment indication

// Europe

- Preparing for submission for both treatment and prophylaxis indications

// Japan • Asia

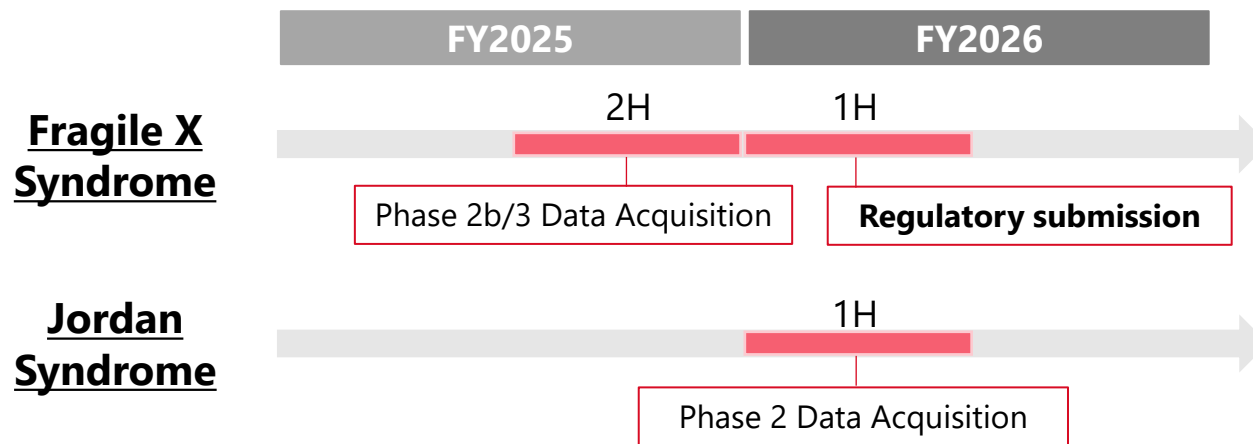

- Japan:
 - Application submitted to add prophylaxis indication
 - Planned to submit the pediatric treatment indication application within Q1
- Expanding to other Asian countries

Development Zatolmilast / S-898270

Accelerating the development of two PDE4D inhibitors expected to improve cognitive function, aiming for the early delivery of solutions

// Zatolmilast

“Aiming to become a First-in-Class treatment for two rare diseases”

Working to improve cognitive function in patients with hereditary neurodevelopmental disorder

// S-898270

“Alzheimer’s Disease (Mild Cognitive Impairment, Dementia)”

Next-Generation PDE4D Inhibitor

- Expected to deliver **efficacy at lower doses with improved safety**
- Confirmed **enhancement of cognitive function** in non-clinical studies

Phase 1 trial scheduled to start in the first quarter of FY2025

Future Development Policy for S-309309

Considering the potential development of a highly safe anti-obesity drug that suppresses weight rebound after discontinuation of GLP-1 administration

// Challenges of existing treatments (GLP-1)

"Difficulty of continuous treatment and medical needs"

- Percentage of patients who discontinue GLP-1 due to side effects, costs, and lack of insurance coverage*¹ **74.8 %**
- Percentage of patients who wish to maintain weight after weight loss among those who discontinued GLP-1*¹ **86.7 %**
- Percentage of patients who experience weight rebound after discontinuation of GLP-1 treatment*² **80.0 %**

// Non-clinical trial results (monkeys)

- Over view
1. Administered GLP-1 to obese monkeys, resulting in approximately 15% weight reduction over 7 weeks
 2. GLP-1 administration and administer S-309309 or placebo (for 10 weeks).

10-week Interim Report after Discontinuation of GLP-1 Administration (Ongoing Evaluation)

The S-309309 administration group suppressed the weight rebound observed in the placebo group by approximately **50%** (group average)

Potential effectiveness in weight management and rebound suppression after weight loss with GLP-1

S-151128: Phase 1b Trial Results

Although a favorable safety profile was confirmed with repeated administration, the expected efficacy was not observed

// Phase 1b Trial Overview

In addition to safety and pharmacokinetics during repeated administration, exploratory efficacy was evaluated

| | |
|--|---|
| Country | Japan |
| Subjects | Countries of Implementation: Patients with Osteoarthritis of the Knee (patients otherwise healthy except for knee pain) |
| Trial Design | Multicenter, Randomized, Placebo-Controlled, Observer-Blind |
| Dosage and Administration Number of cases | Treatment Groups: Active Drug, Placebo Total 76 Cases* ¹ Two intermittent intravenous administrations at 28-day intervals (30 minutes each) |

// Phase 1b Results

Safety (Primary Endpoint)

- No issues with tolerability

Efficacy (Exploratory)

- Analgesic effect for osteoarthritis of the knee was not confirmed

*¹ The sample size is not sufficient to detect a statistically significant difference between the active treatment group and the placebo group in terms of WOMAC pain scores

R&D Milestones Planned for FY2025

※Topline results: It is the timing of acquisition, and the timing of disclosure will be considered separately

| Disease area | Pipeline | Indication | Current stage | FY2025 1H | FY2025 2H |
|--------------------------------------|------------------------------|---|-----------------------------------|-------------------------|----------------------------|
| Infection Diseases | Ensitrelvir | COVID-19 treatment | Submission | Submission (EU) | |
| | | COVID-19 PEP | Submission | Submission (US, EU) | Approval (Japan) |
| | | COVID-19, Pediatric (Treatment and prevention in under 12 years of age) | Preparation for global submission | Submission (Japan) | |
| | S-268024 | COVID-19 (JN.1Vaccine) | Phase 3 | Phase 3 Topline results | |
| | Cefiderocol | AMR Pediatric (Gram-negative bacteria infection) | Phase 3 | Phase 3 Topline results | Submission (US, EU) |
| | S-892216 | COVID-19 treatment (Oral) | Phase 2 | | Phase 2 Topline results |
| | S-743229 | AMR (Complex urinary tract infection) | Phase 1 | | Phase 1 Topline results |
| | S-649228 | AMR (Gram-negative bacteria infection) | Phase 1 | | Phase 1 Topline results |
| QOL Diseases with High Social Impact | Zuranolone | Depression | Submission | Approval (Japan) | |
| | Zatolmilast | Fragile X syndrome | Phase 2/3 | | Phase 2/3 Topline results |

FY2025 Financial Forecasts and Shareholder Return

SHIONOGI

Budget assumptions

// Revenue

Prescription drugs

- Growth in the domestic Acute Respiratory Virus Infection Treatment
- Growth of Quviviq
- Launch of new products (Zuranolone, Endeavoride)
- Adding the revenue from JT Group's Pharmaceutical Division

Royalty income

- Further growth expected in ViiV's HIV

Overseas subsidiaries/export

- Volume expected to reach a record high, but revenue is projected to decline year-on-year due to foreign exchange impact

// Cost

Cost of Sales

- Increase in costs due to acquisition of domestic products and sales growth
- Controlling cost ratio through further growth of products with lower cost ratios

SG&A expenses

- Expansion of information activities due to the increase in domestic focus products
- Building a foundation for the launch of new products overseas
- Promoting globalization

R&D expenses

- Continuing active investment in globally developed in-house products

Financial Results

Earnings forecast

- Sales revenue and operating profit are expected to reach record highs for the fourth consecutive term
- All profit items are expected to increase
- Investment towards achieving 2030 Vision will be further accelerated

(Unit: B yen)

- COVID-19 Treatment : Xocova
- Influenza Franchise : Xofluza, Rapiacta

Shareholder Returns

Shareholder return policy through which shareholders can feel our growth

- Enhance capital efficiency through share buybacks, cancellation of treasury shares, and unwinding of cross-shareholdings
- The year-end dividend is planned to increase by 4 yen per share from the previous forecast, resulting in 33 yen*¹ (pre-split : 99 yen)*²
- The annual dividend is planned to be 61 yen (pre-split 184 yen), marking the 13th consecutive year of dividend increases
- Plan to increase dividend again for the 14th consecutive year in FY2025

*¹ Effective October 1, 2024, Shionogi has implemented a 3-for-1 stock split of its common stock. Dividends and Treasury stock's Cancellation are calculated based on the assumption that the stock split was implemented at the beginning of the FY2012 *² [Press Release April, 2025](#)

*³ Resolution passed on March 30, 2020, and treasury shares cancelled on April 6 *⁴ Resolution passed on July 31, 2023, and treasury shares cancelled on April 17, 2024

Pipeline: Infectious Disease

as of May 12, 2025

Change from February 1, 2025, to May 12, 2025

- Ensitrelvir (COVID-19 PEP): Submitted in Japan, Rolling submission started in US
- " (COVID-19 treatment) : NDA withdrawal in Singapore, plans to add data from the SCORPIO-PEP trial and resubmit application
- S-268024 (COVID-19 vaccine): Phase 3 started
- S-892216 (COVID-19 treatment): Phase 2 started
- S-892216 (COVID-19 pre-exposure prophylaxis): Phase 1 started

: Progress from to February 1 2025, to May 12, 2025

Pipeline: QOL Diseases with High Social Impact

as of May 12, 2025

Change from February 1, 2025, to May 12, 2025

- ENDEAVORRIDE: Approved in Japan
- SDS-881: Phase 3 started

Out license

S-365598 Phase 2a Trial Design

Double-blind, randomized, placebo-controlled, proof-of-concept, phase 2a trial

Inclusion criteria

- Aged 18-65 years
- Naive to ART
- HIV-1 RNA ≥ 3000 c/mL
- CD4+ cell count ≥ 200 cells/mm³
- BMI 18.5-31.0 kg/m²

Randomization

S-365598 10 mg Q3D (N=6)^a

S-365598 50 mg Q3D (N=6)^b

S-365598 300 mg Q3D (N=7)^c

Matching placebo Q3D (N=3)

Endpoints

- Primary endpoint: Maximum change from baseline in plasma HIV-1 RNA through Day 10
- Secondary endpoints: Safety, tolerability, exposure-response relationship, immunologic effects, and treatment-emergent resistance

ART, antiretroviral therapy; BMI, body mass index; cART, combination ART; PA-IC₉₀, protein-adjusted 90% inhibitory concentration; Q3D, every 3 days; SOC, standard of care; VH-184, VH4524184.

^aTarget concentration of $1 \times \text{PA-IC}_{90}$. ^bTarget concentration of $4 \times \text{PA-IC}_{90}$. ^cTarget concentration of $24 \times \text{PA-IC}_{90}$. ^dParticipants received oral VH-184 or matching placebo on Days 1 (baseline), 4, and 7.

Overview of Transaction

- ① **Succession of JT Pharmaceutical Division through a company split**
- ② **A public tender offer for TORII PHARMACEUTICAL CO., LTD. by SHIONOGI**
- ③ **Acquisition of shares of Akros Pharma Inc. by Shionogi Inc.**

JT Group's Pharmaceutical Division

Transaction Process

With the successful completion of the tender offer for Torii's shares, all of JT's Group Pharmaceutical Division will be transferred to SHIONOGI

Implementation of a tender offer for minority shareholders of Torii

※ JT has agreed not to participate

- Acquisition of own shares by Torii
- Complete subsidiary acquisition by SHIONOGI

- The succession of JT Pharmaceutical Division
- Acquisition of shares of Akros Pharma Inc.

The Main Purchase Conditions for the Tender Offer by SHIONOGI for TORII

| | |
|--|--|
| Tender Offeror | Shionogi & Co., Ltd |
| Target Company | TORII PHARMACEUTICAL CO., LTD. |
| Methods | Tender Offer |
| Tender Offer Period(Planned) | From Thursday, May 8, 2025 to Wednesday, June 18, 2025 (30 Business Days) |
| Settlement start date(Planned) | June 25, 2025 |
| The purchase price | Per common share 6,350 yen |
| Premium | Closing price on May 2, 2025 (5,230 yen) : Approximately 21.4% |
| | The average closing stock price over the past month (4,432 yen) : Approximately 43.3% |
| | The average closing stock price over the past three month (4,482 yen) : Approximately 41.6% |
| | The average closing stock price over the past six month (4,559 yen) : Approximately 39.3% |
| The minimum number of shares planned for purchase | 3,342,000 shares |
| The maximum number of shares planned for purchase | Nothing |
| The total purchase amount | Approximately 80.7 billion yen (Self-funding) |
| Tender offer agent | SMBC Nikko Securities Inc. |

Actions Following the Announcement of This Transaction

Future planned actions

- September 2025 : The effectiveness of the stock consolidation and acquisition of own shares
⇒ Torii will become a wholly-owned subsidiary of SHIONOGI
- December 2025 : The effectiveness of the company split ⇒
- JT Pharmaceutical Division will be absorbed by SHIONOGI
 - Akros will become a wholly-owned subsidiary of Shionogi inc.
- At the time of effectiveness for each of the above transactions, there will be no changes implemented in terms of business relationships, employee duties, workplaces, or working styles

Business Stabilization - The Strength of TORII -

Torii is steadily growing by focusing on Allergy and Skin Diseases as its growth drivers

The franchise field

Allergens

- Over the past few years, Torii has achieved strong growth in the allergy areas.
- From July 2025, Torii plans to increase the production of the cedar pollen sublingual tablets "CEDARCURE" with the completion of new production facilities.
- Additionally, Torii aims to begin clinical trials for the grass pollen sublingual tablet within 2025.

Skin diseases

- Due to the growth of products like Correctim, Torii has achieved steady growth.
- With the penetration of Vtama which was launched in October 2024, Torii expects further increases in sales revenue.
- Additionally, in December 2024, Torii submitted a domestic manufacturing and sales application for a product indicated for molluscum contagiosum.

Renal diseases and Hemodialysis

The sales revenue of Torii

Utilization of SHIONOGI's own Production Capabilities

SHIONOGI Group's own production facilities contributes to stable supply and cost reduction

SHIONOGI's own factories

Settsu Plant

Kanegasaki Plant

Amagasaki Office

Itami Plant

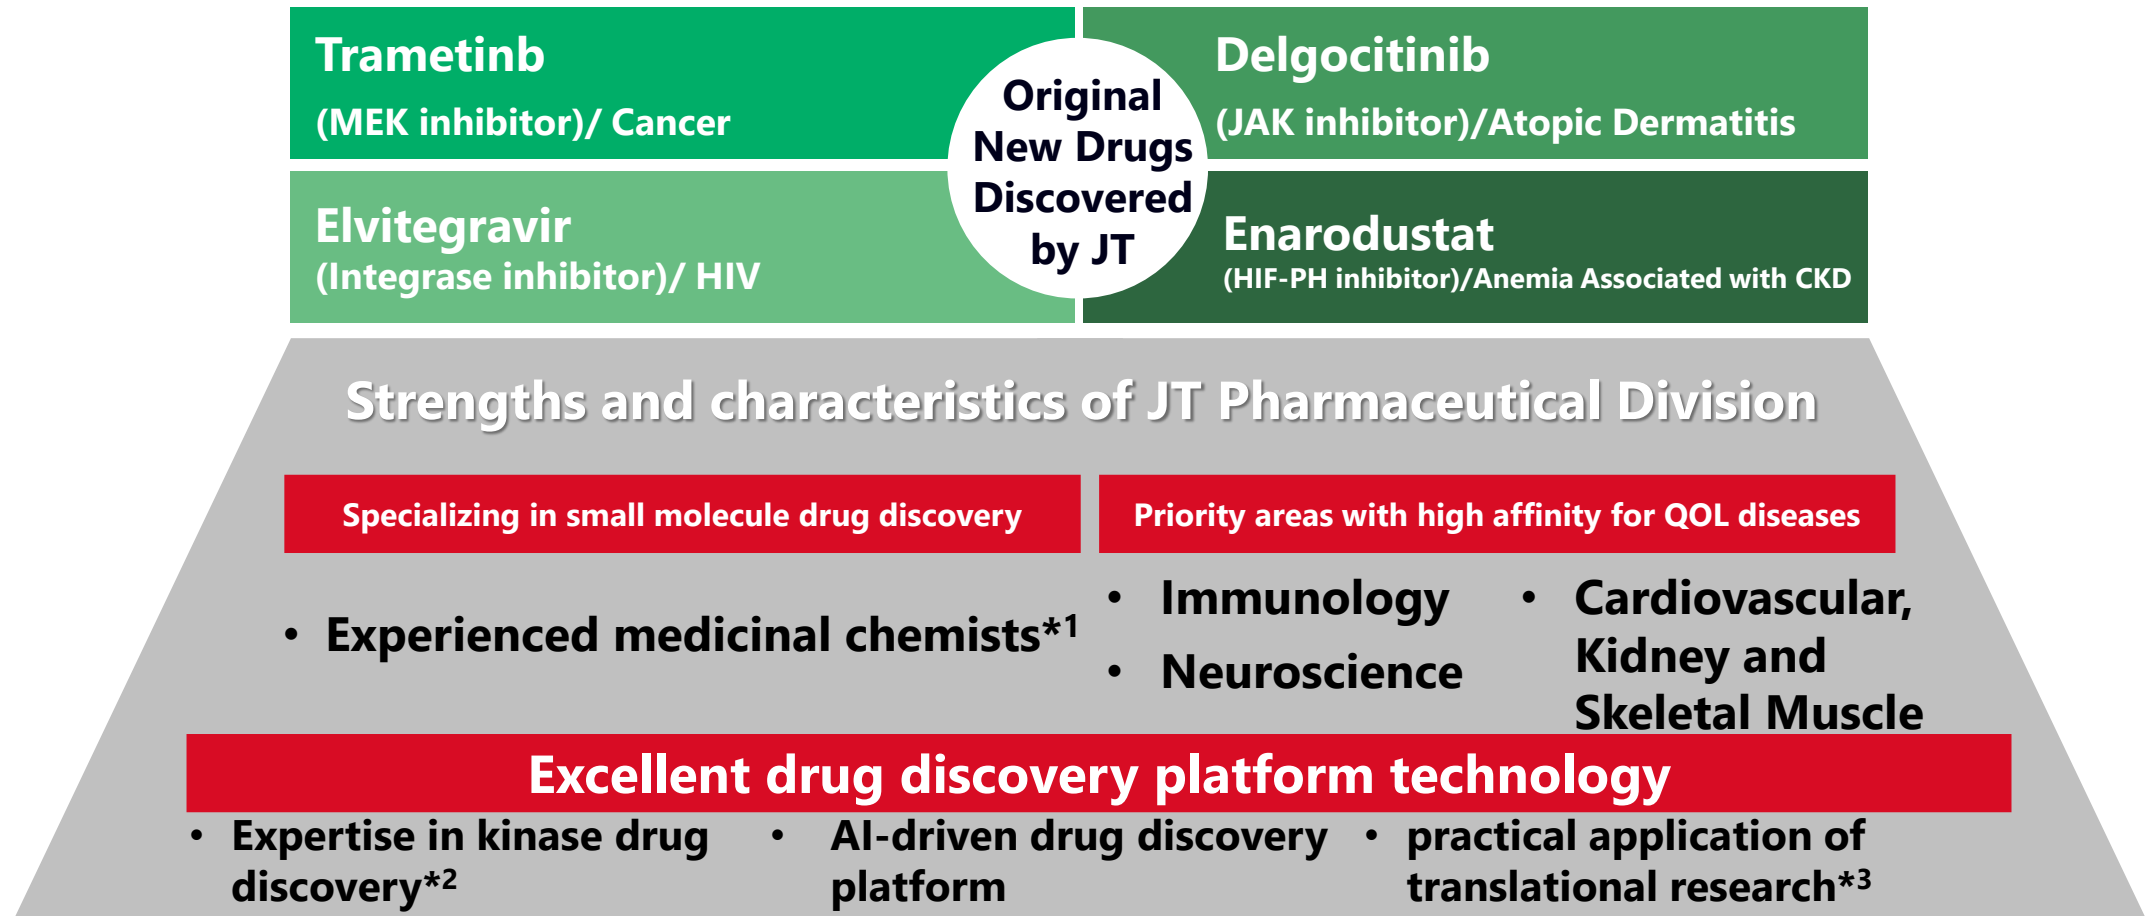

Tokushima Plant

For the products of JT Group's Pharmaceutical Division, it is possible to establish a flexible in-house production capabilities, including increased production and the construction of a global supply chain

Strengthening R&D Capabilities - JT Pharmaceutical Division's strengths -

Excellent drug discovery achievements and a strong foundation in small molecule drug discovery

Building the No. 1 Global Capabilities in Small Molecule Drug Discovery

Strengthening our research capabilities to deliver the best medicines globally

Strengthen Small molecule drug discovery capabilities within the area of infectious diseases

- **Utilizing the AI-driven drug discovery platform**
 - Accelerating research and development
- **Integrating the experience and expertise of medicinal chemists**
 - Continuously discovering a competitive pipeline

Discovering a promising pipeline in the field of high social impact QOL diseases

- **Utilizing drug discovery platform technologies**
 - Exploring promising targets
- **Strengthening research capabilities with a focus on clinical applications**
 - Building high-probability success pipelines

Enhancing small molecule drug discovery capabilities and creating a continuous development pipeline in focused areas

Accelerating our Transformation into a Global Pharmaceutical Company

SHIONOGI has acquired JT Group's pharmaceutical Division as a whole, contributing to addressing the unmet needs of patients worldwide

Other Major Progress*1

- **February**

- AI program for diagnostic support(SDS-881) for conversational cognitive function testing (neuropsychological testing) has been designated as a priority review item for program medical devices by the Ministry of Health, Labour and Welfare

- **March**

- Established the first domestic startup support fund specialized in promoting women's participation called "WPower Fund I"
- Conclusion of a Comprehensive Collaboration Agreement with Osaka Metropolitan University in the Field of Infectious Diseases
- Signed a partnership agreement with the UK-based organization for the deaf, "Royal National Institute for Deaf People"
- Transition to Company with Audit and Supervisory Committee

- **April**

- ESCMID Global 2025: Shionogi presents real-world data demonstrating better clinical outcomes when Fetcroja® / Fetroja® (cefiderocol) is used as empiric or documented therapy as compared to salvage therapy for the treatment of Gram-negative bacterial infections
- Selected for "DX Attention Company 2025"
- Further Agreement with Apnimed for Sleep Disorder Treatments - Introduction of New Assets to Joint Venture Shionogi-Apnimed Sleep Science – (SASS)

- **May**

- Shionogi, Nagasaki University, Saraya, and Connect Afya Enter into a Comprehensive Partnership Agreement to Support Antimicrobial Stewardship in Kenya
- Collaborative Research Agreement on Hearing Loss with Cilcare

Forward-Looking Statements

Official earnings guidance should be referred to in the disclosure of the annual financial report (*kessan tanshin*) in accordance with the rules set by Tokyo Stock Exchange.
- Materials and information provided during this presentation may contain so-called “forward-looking statements”. These statements are based on current expectations, forecasts and assumptions that are subject to risks and uncertainties which could cause actual outcomes and results to differ materially from these statements.
- Risks and uncertainties include general industry and market conditions, and general domestic and international economic conditions such as interest rate and currency exchange fluctuations. Risks and uncertainties particularly apply with respect to product-related forward-looking statements. Product risks and uncertainties include, but are not limited to, technological advances and patents attained by competitors; challenges inherent in new product development, including completion of clinical trials; claims and concerns about product safety and efficacy; regulatory agency’s examination period, obtaining regulatory approvals; domestic and foreign healthcare reforms; trend toward managed care and healthcare cost containment; and governmental laws and regulations affecting domestic and foreign operations.
- For products that are approved, there are manufacturing and marketing risks and uncertainties, which include, but are not limited to, inability to build production capacity to meet demand, lack of availability of raw materials, and failure to gain market acceptance.
- Shionogi disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
- This material is presented to inform stakeholders of the views of Shionogi's management but should not be relied on solely in making investment and other decisions.
- You should rely on your own independent examination of us before investing in any securities issued by our company. Shionogi shall accept no responsibility or liability for damage or loss caused by any error, inaccuracy, misunderstanding or changes of target figures or any other use of this material.
- This English presentation was translated from the original Japanese version. In the event of any inconsistency between the statements in the two versions, the statements in the Japanese version shall prevail.
