- Strengthening the sales activities in both CNS and Pain areas to maximize the potential of Cymbalta®
- Launch of Actair® and Mulpleta®
- Pre-launch activities for S-877503 (pediatric ADHD)

◆ Strengthening capability to support new global products

- Osphena®
 - Outcomes from efforts to support patient access and DTC outreach
 - Increased new prescriptions
 - Decreased the abandonment rate by patients who were prescribed Osphena®
 - Initiated Phase III clinical study for vaginal dryness to maximize the value of Osphena®
- Establishing platform for NDA submission and launch of naldemedine

Research & Development

FIC

First-in-Class

Innovative medicines with particularly high novelty and efficacy that can significantly change the existing therapeutic paradigm.

LIC

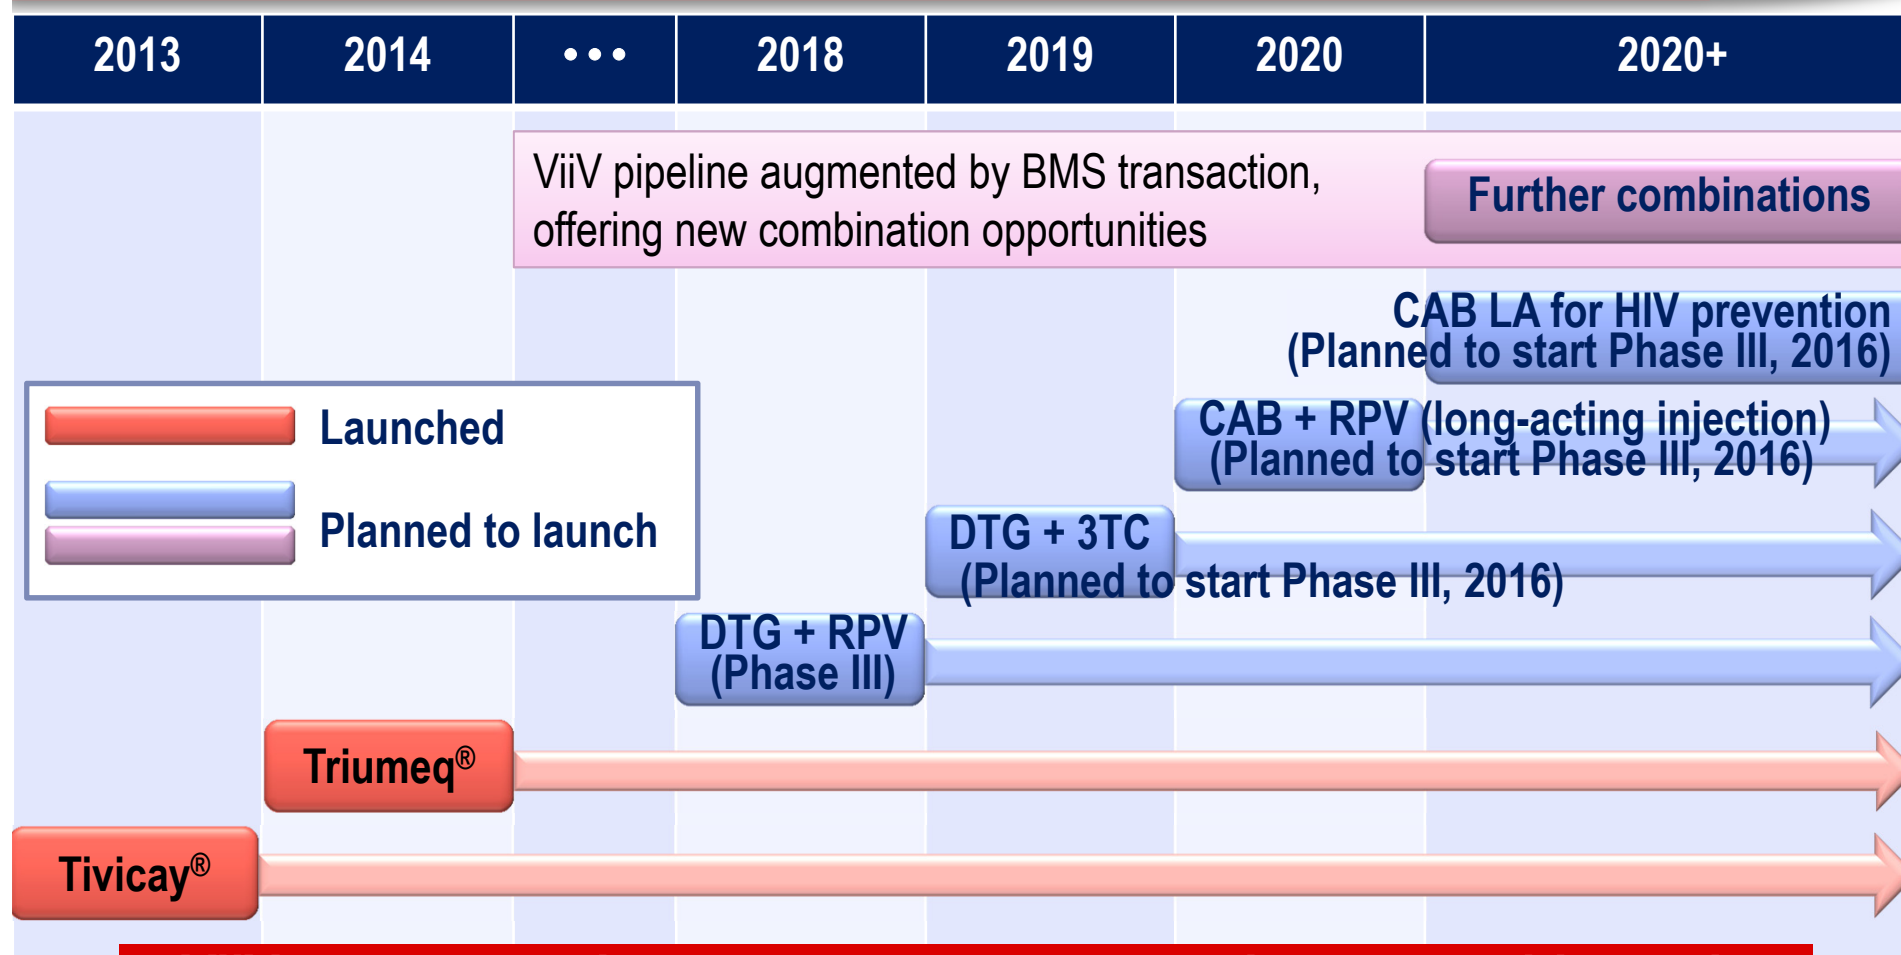

Last-in-Class

Unrivaled medicines with clear superiority over others that have the same mechanism of action.

HIV Integrase Inhibitor Franchise

ViiV strategy to develop new treatment regimens to address the needs of people living with HIV places our HIV integrase inhibitors at the core of therapy

Revision of Contract for Cephalosporin Antibiotics

Former contract

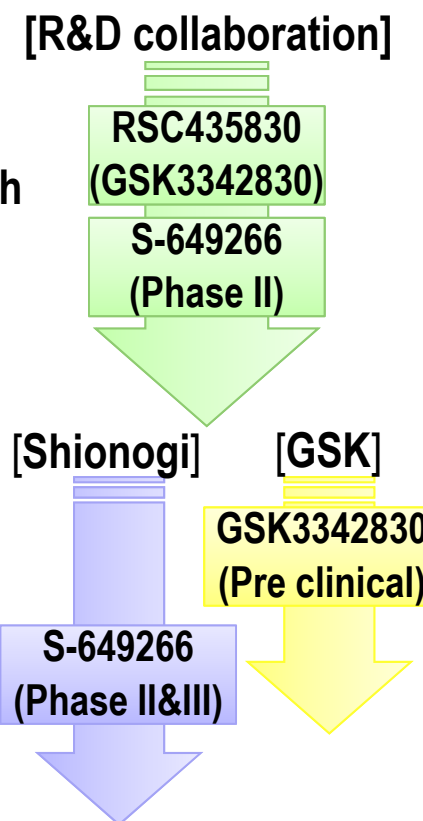

- ◆ Initiated the research and development collaboration with GSK in 2010
- ◆ Focused on development of novel cephalosporins
 - Most advanced compound was S-649266
 - Shionogi received upfront and milestone payments
- ◆ Provided for shared costs and profits in certain major markets, while each company had exclusive, royalty-bearing rights in other territories
- ◆ Collaboratively discovered RSC435830 (GSK3342830)
 - The profile of RSC435830 is different from S-649266

Revision of Contract in Nov. 2015

Revised contract

- ◆ Shionogi will pursue development and commercialization of S-649266 and GSK will pursue development and commercialization GSK3342830 fully independently from the revision
- ◆ Shionogi received a payment upon execution of the restated agreement and will receive payments upon achievement of certain milestones in the progression of GSK3342830. Certain royalties will be payable by each party to the other on net sales of their respective compounds

Gram-negative bacterial infections represent a serious problem worldwide, particularly with the increasing prevalence of multi-drug resistant strains. Both companies will focus each resource on their selected compound to accelerate the development

Naldemedine, Cymbalta® and S-877503

◆ Naldemedine

- Indication

- Opioid-induced constipation

Japan, US: NDA submission (in preparation)
(Planned to NDA submission in FY2015)

◆ Cymbalta® (duloxetine)

- Indication

- Pain associated with chronic low back pain:
Japan: NDA submission (Dec. 2014)

- Pain associated with chronic osteoarthritis:
Japan: NDA submission (in preparation)
(Planned to NDA submission in FY2015)

◆ S-877503 (alpha2A-adrenergic receptor agonist)

- Indication

- ADHD (pediatric): Japan NDA submission (Jan. 2016)
- ADHD (adult): Japan Phase III study
