and Children Goes
Around and Expands~

Mother to Mother

SHIONOGI Project

Our project supports children's and mothers' health
as the basis of prosperity of society.

SHIONOGI strives constantly to supply the best possible medicine (healthcare solutions) to protect the health and wellbeing of the patients we serve. To build a sustainable society, it is necessary to create a favorable environment for the next generation of children to grow healthy.

"Mother to Mother SHIONOGI Project" aims to achieve universal health coverage (UHC) by protecting pregnant and lactating women and children under 5 years of age from preventable death and by strengthening health systems.

Mother to Mother SHIONOGI Project

Vision

To develop sustainable communities for the well-being of mothers and children.

Goal

Improving health of pregnant and lactating women and health of children under 5 years of age

Establishment of sustainable community health systems

Activities

Improvement of infrastructure

Education and sensitization

Enhancement of the community support system

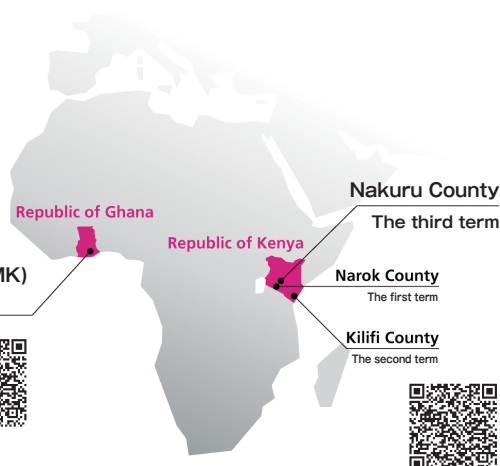

High maternal mortality rate and under-5 child mortality rate are major issues in Sub-Saharan Africa.

Since 2015, "Mother to Mother SHIONOGI Project" has worked to improve maternal and child health in collaboration with various partners, with donations from SHIONOGI group employees as a fund source. This will be done through collective impact*, an approach of effectively combining the strengths of the respective partners, including business enterprises and NGOs.

In the third term project, which was launched in 2023, we particularly focus on enhancing access to healthcare, improving the sanitary environment, and reducing diarrhea among children, all of which are major challenges faced in low- and middle-income countries.

*It maximizes the impact of the efforts by organizations including business enterprises, governments and NGOs/NPOs by their collaborative commitment to solving social issues.

Upper Manya Krobo (UMK)
District, Eastern Region
The third term

Healthcare issues in Nakuru County

Crowded health center

Obstetrics not separated from outpatients
