

# First Term Project Plan

**1. Improved capacity and access to healthcare services for mothers and children**

**2. improving people's nutritional and water hygien**

**3. Better quality of healthcare services**

**Theme: Establish a base for health professionals and systems**

- Build health facilities (obstetric ward)
- Mobile clinic
- Improving basic knowledge and skills of maternal and child health services for healthcare professionals
- Trainings for community health workers

- Implementation of nutrition training for community health workers
- Strengthen efforts to improve community nutrition
- Help spread correct hygiene knowledge and habits across schools and the communities

- Launch and train advocacy groups
- Conduct a baseline survey

# 1. Improved capacity and access to healthcare services for mothers and children

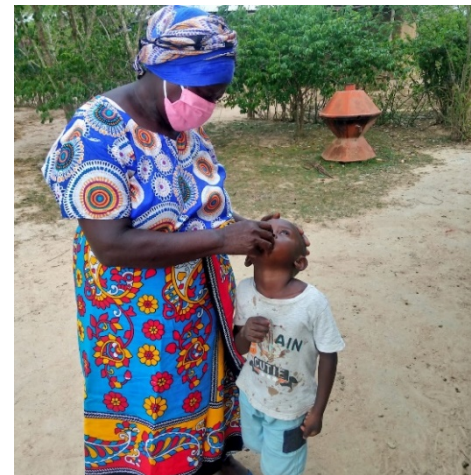

Obstetric ward built  
(in Midoina Dispensary, November 2020)

Obstetric ward built  
(in Jaribuni Dispensary, November 2020)

A scene from mobile clinic services  
(at Midoina Dispensary, September 2020)

A village health worker  
giving a vitamin A  
compound to a child during  
a household visit

# 1. Improved capacity and access to healthcare services for mothers and children

Lecture and technical training given to medical professionals (physician extenders and nurses) working for dispensaries in the project location (September 2020)

Monthly meeting of village health workers held (at Jaribuni Dispensary, September 2020)

## **Mother to Mother groups formed in Midoia**

14 groups, 126 members

The sharing of correct information among mothers with common concerns and thoughts as a peer education activity helped encourage them to use health and nutrition services provided at health facilities.

A scene from an agricultural support session for a Mother to Mother group

## 2. improving people's nutritional and water hygien

Nutritional improvement activity for residents by medical professionals (at Midoina Dispensary, September 2020)

A scene from a training session to deepen knowledge about nutrition for a Mother to Mother group

Items and equipment for protection against COVID-19 distributed and installed:

- water tanks, hand washing stands on tripods
- liquid soap, disinfectant
- masks

### 3. Better quality of healthcare services

Assistance for household registration given  
(at Lima La Perla Dispensary, August 2020)

To officials of the Ministry of Health in the county and the sub-county, we introduced this project and regularly reported project activities. We set up a project management committee with the Ministry of Health to regularly report and evaluate the progress of the project.

**We started activities to achieve the goal for year 1:  
“Establish a base for health professionals and systems.”  
In response to COVID-19, we gave support as needed.**
